Cylindrical Laser Mounts

- Accurate beam placement over long distances
- Holds cylindrical laser heads ranging from 1–1.75 in. (25.4–44.5 mm)
- Laser beam centerline lines up over table holes
- English and Metric compatible
- $\pm 4.5^\circ$ tip and tilt

ULM Series Cylindrical Laser Mounts attach to 340-RC and 370-RC Rod Clamps and provide a convenient way to attach any 1–1.75 in. (25.4–44.5 mm) diameter cylindrical laser to Newport positioners and tables. To prevent wobble, the laser head is held securely by a nylon thumbscrew against two full-length contacts formed by a V-groove.

Model ULM-TILT provides two axes of precision angular adjustment using a stable kinematic three-point design for drift-free pointing of laser heads and other cylindrical objects.

Model ULM is a fixed, non-adjustable laser mount that may be bolted to other components via three horizontal clearance holes.

Ordering Information

Model	Description
ULM	Cylindrical Laser Mount, 1.0-1.75 in. Diameter, Fixed
ULM-TILT	Cylindrical Laser Mount, 1.0-1.75 in. Diameter, High-Resolution AJS Adjusters
ULM-TILT-M	Cylindrical Laser Mount, 1.0-1.75 in. Diameter, SM-13 Micrometers
