

Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

SERVICE CENTER REPAIRS

Experienced engineers and technicians on staff at our full-service, in-house repair center

*InstraView*SM REMOTE INSPECTION

Remotely inspect equipment before purchasing with our interactive website at www.instraview.com ↗

WE BUY USED EQUIPMENT

Sell your excess, underutilized, and idle used equipment. We also offer credit for buy-backs and trade-ins. www.artisanng.com/WeBuyEquipment ↗

Acterna InfiniPort Test System

The world's most compact multiport 10/2.5 G testing solution

InfiniPort's unique form factor is a paradigm shift in high-channel count optical networking testing, and its almost infinite scalability makes it a truly cost effective solution.

HIGHLIGHTS

- Highest density available, with 16 independently configurable ports in a 2 in (5.5 cm) high chassis, with almost infinite scalability through daisy chaining
- Reduces time and cost to test high-channel count 10/2.5 G optical systems
- Verifies correct network element operation with comprehensive 10/2.5 G multiport test functionality
- Maximizes the use of test resources through multi-user access from multiple locations
- Simplifies test development and automation with rapid GUI to SCPI translation

APPLICATIONS

- Performs verification of optical networking equipment by generating multiple test signals to stimulate large numbers of 10/2.5 G ports
- Conducts validation testing of DWDM networks by measuring the BER on each port of a multi-channel system, and is able to analyze different tributaries within the 10/2.5 G signal
- More info

FEATURES

- Tests optical interfaces at both 10/2.5 G rates and performs mapping analysis for both SONET and SDH tributaries from STS-192c to STS-1 and STM-64c to STM-1
- Overhead byte manipulation provides the ability to verify the functionality of the network element under alarm/error conditions.
- APS switchover measurement ensures network elements are operating within industry specifications.
- Verification of performance monitoring for ITU-T G.826 and G.828
