

Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

SERVICE CENTER REPAIRS

Experienced engineers and technicians on staff at our full-service, in-house repair center

PMC-422

Eight Port Serial Controller

Features

- PMC form factor
- Eight port RS232/RS422/RS485 serial controller
- PCI bus 2.2 target interface compliant up to 33 MHz clock, 32-bit bus
- Eight high performance 16C550 UARTs with 64 bytes of TX/RX FIFO per channel
- All ports accessible on rear I/O J4 with PMC I/O Module (PIM) PIM422RC
- 4 RS232 ports can be accessible via front RJ45 connectors
- Automatic RTS/CTS or DTR/DSR flow control
- Automatic Xon/Xoff software flow control
- RS485 half-duplex control with selectable delay
- Conformal coating optional

The PMC-422 is a flexible solution for integrating multiple serial I/O channels onto a Single Board Computer (SBC), VMEbus or CompactPCI system. Efficiently packaging eight serial channels onto a single PMC makes effective use of available PMC sites. Each serial port is implemented with an independent UART with a separate programmable baud rate.

An Octal UART is used to increase performance by reducing programmed I/O operations. Use of the Octal UART also minimizes the time required to integrate the PMCs into existing software environments, plus provides an evolutionary path for enhanced software to further improve performance.

Each of the ports in a pair has individually programmable line drivers to set any of the most popular signaling types: RS232, RS422, RS485 (full-duplex and half-duplex with termination or non-termination option). The signaling characteristics are set with on-board DIP switches. Each serial ports baud rate is separately programmed from 150 bits/s to 6.2 Mb/s, depending on specific crystal used.

Additionally, a 16-bit general purpose Timer/Counter with eight general inputs is provided. Eight bits can be set with on-board switches and read by the host. A total of 256 combinations is possible.

PMC-422 Eight Port Serial Controller

Specifications

Form Factor

- PMC

PCI Bus Characteristics

- Signaling: 3.3V and 5V
- Specification 2.2
- 33 MHz/32-bit

Serial Characteristics

- Eight rear RS485/RS422/RS232 serial ports
- Four RS232 ports on front; RJ45 connectors (front ports are not available for RS485 and RS422)

Power Requirements

- 3 watts total
- 0.3A @ 3.3V
- 0.4A @5V

Environmental

- Operating Temperature: 0° to +60 °C
- Storage Temperature: -40° to +85 °C
- Relative Humidity: 5% to 95%, non-condensing

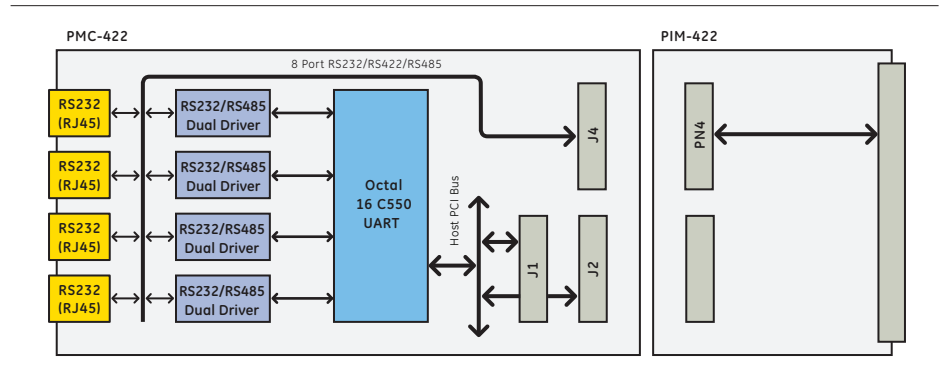

MTBF

- 253,000 hours (MIL 217-F Nav Shel 25 Deg. C)

Regulatory Compliance

- European Union (CE Mark)
 - EN55022 Radiated Emissions Class A
 - EN55022 Conducted Emissions Class A
- United States
 - FCC 47 Part 15, Class A
- Safety
 - UL60950-1
 - CSA C22.2, No. 60950-1
 - EN60950-1 (Low Voltage)

Block Diagram

Ordering Information

PMC-422 PMC with eight serial channels routed to rear I/O; J4 connectors

PIM-422 PIM for PMC-422

Suffix -CC to model number to indicate conformal coated boards

About GE Intelligent Platforms

GE Intelligent Platforms, a General Electric Company (NYSE: GE), is an experienced high-performance technology company and a global provider of hardware, software, services, and expertise in automation and embedded computing. We offer a unique foundation of agile, advanced and ultra-reliable technology that provides customers a sustainable advantage in the industries they serve, including energy, water, consumer packaged goods, government and defense, and telecommunications. GE Intelligent Platforms is a worldwide company headquartered in Charlottesville, VA and is part of GE Home and Business Solutions. For more information, visit www.ge-ip.com.
