

Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

SERVICE CENTER REPAIRS

Experienced engineers and technicians on staff at our full-service, in-house repair center

- Single, high-performance, mixed-signal, 16-bit stereo
- PCI parallel bus interface, version 2.1
- High-quality ESFM music synthesizer
- Built-in amplifier delivers to 8 Ω speakers up to 1.3 W/channel
- Dynamic range (SNR) over 80 dB
- Integrated Spatializer 3-D audio effects processor
- Record and playback features
 - Record, compress, and playback voice, sound, and music
 - 16-bit stereo ADC and DAC
 - Programmable independent sample rates from 6 kHz up to 48 kHz for record and playback
 - Full-duplex operation for simultaneous record and playback
- Mixer features
 - 7-channel mixer with stereo inputs for line, music synthesizer, digital audio (wave files), and mono inputs for microphone and speakerphone
 - Programmable 6-bit logarithmic master volume control
- External connections
 - Speakers
 - Microphone
 - Line in
 - Line out
- Power
 - Advanced power management meets ACPI standards
 - 5.0 V operation
- Compatibility
 - Supports PC games and applications for Sound Blaster and Sound Blaster Pro
 - Supports Microsoft® Windows® Sound System
 - Meets PC 97/PC 98 and WHQL specifications
 - Microsoft Windows NT® 4.0, Windows 98 SE, and Windows 2000 supported
 - PMC IEEE-P1386 common mezzanine card, standard (5 V PCI signaling only)

INTRODUCTION — The VMIPMC-7440 is a fully integrated PMC solution providing high-quality audio processing while maintaining full legacy DOS game compatibility. With a dynamic range with more than 80 dB, the VMIPMC-7440 complies with the Microsoft PC 97/PC 98 specifications, and meets WHQL audio requirements. The VMIPMC-7440 forms a complete audio subsystem providing microphone, line in, line out, and speaker out interface via 3.5 mm stereo jacks.

PRODUCT OVERVIEW — The VMIPMC-7440 incorporates a microcontroller, ESFM music synthesizer, 3-D stereo effects processor, 16-bit stereo wave ADC and DAC, 16-bit stereo music DAC, DMA control logic with FIFO, and PCI bus interface logic.

The VMIPMC-7440 integrates field-proven hardware design for DOS game compatibility with hardware FM synthesis (ESFM) and three methods for legacy audio control interface: PC/PCI, Distributed DMA, and Transparent DMA. Transparent DMA requires no sideband signals from PC core logic chipsets in addition to the standard PCI 2. The VMIPMC-7440 can record, compress, and playback voice, sound, and music with built-in mixer controls. It supports stereo full-duplex operation for simultaneous record and playback. The ESFM synthesizer has extended capabilities within native mode operation providing superior sound and power-down capabilities. The integrated 3-D audio effects

processor uses technology from Spatializer Audio Laboratories, Inc., and expands the sound field emitted by two speakers to create a resonant 3-D sound environment. The VMIPMC-7440 is compliant with advanced configuration and power interface (ACPI) standards.

PHYSICAL/ENVIRONMENTAL

Temperature Range: 0 to 50 ° C

Storage Temperature: -40 to 85 ° C

Power Requirements: 240 mA (maximum) 5 V, 440 mA (maximum) 12 V

MTBF: 868,372 hours (Bellcore)
