199999/120000 Counts Dual Display Digital Multimeter

GW Instek GDM-8255A/8251A portable precision multimeters engage with 5 1/2 digits, dual-display, 0.012% high DC voltage accuracy and various advanced measuring function to make electrical relative signal measurement faster and easier. In addition, the standard RS-232 and USB device make the GDM-8255A/8251A an ideal tool and inexpensive solution for field service, development/maintenance, education and ATE system applications.

Various Measuring Functions

GDM-8255A/ 8251A provide 9 major measuring functions such as DCV/ACV, DCI/ACI, 2w/4w Resistance, Diode, Frequency, Continuity test and Temperature. The 0.012% DC voltage accuracy provides user the best measuring precision at the DC voltage applications.

In addition, there are several advanced measuring functions such as Max, Min, dB, dBm, REL/REL#, Hold, Compare and Math functions to enhance the serviceability of measuring results.

Combinational Dual Display

The GDM-8255A/ 8251A offer varieties of dual display combinations with main measurement function which allows the GDM-8255A/8251A to measure two properties of input signal. The dual display function can save customers measuring time when dealing with applications require multiple parameters simultaneously.

Standard Multiple Interfaces

GDM-8255A/ 8251A provide the standard multiple interfaces for PC connection: RS232C and USB device port. Unlike the common RS232 transfer speed, the GDM-8255A/8251A even raises the baud rate up to 115200 which is 12 times faster.

It makes the command or data flow faster and smoother.

In addition, the digital I/O terminal outputs the result of comparison measurements to control external devices for ATE applications. By providing an independent VCC for the terminal, the digital I/O outputs can also be used as power source for TTL or CMOS logics.

Convenient Remote Control & Data Capture

For a convenient remote control and a long data capture, the GDM-8255A/8251A accompanies free software, DMM-Viewer. This software allows users to remotely control the GDM-8255A/8251A without entering extra commands. Besides, the software interface and even the measurement method resemble those of GDM-8255A/GDM-8251A front panel, thus guaranteeing safe operation and shortened training and program development time.

For data capturing through a PC, the software allows users to observe measuring result before saving it as a file for further study. In addition, the saved data can be reloaded for converting into a graph. With the DMM-Viewer PC software, the user operation of GDM-8255A/8251A can be much more effective.

Good Training tool for Education

The PC software, DMM-Viewer, is designed using a graphical user interface. With this kind design, users can easily operate as they work with unit. Besides, the DMM-Viewer could be operated as a training tool while it does not communicate with GDM-8251A/8255A. It is beneficial for a class teaching of digital multimeter.

GDM-8255A (199999 Counts) GDM-8251A (120000 Counts)

FEATURES

- GDM-8255A : 199999 Counts Display
GDM-8251A : 120000 Counts Display
- VFD , Two Colors Display
- Auto/Manual Ranging
- 2/4 Wire Resistance Measurement
- Temperature Measurement
- True RMS (AC, AC+DC)
- Selectable Measurement Rate
- Frequency Measurement
- Max./Min., REL, dBm, Compare, Math, Store, Recall, dB

APPLICATIONS

- Products maintenance & development
- Circuit repair & debug
- Auto test equipment
- Education experiment & training
