supplying high-performance communications solutions to OEMs

## **VCOM-54** **eight-port high-speed serial** **communications controller for** **VMEbus**

architecture VME  
interfaces V.35, X.21, EIA-232, EIA-449, EIA-530  
protocols HDLC, LAPB, X.25  
OS support HPUX, HPRT

The VCOM-54 is a high-speed VMEbus serial controller that provides four or eight ports of T1 and E1 rate serial communications.

The single slot VME 64-compatible VCOM-54 was the first communications controller to offer Motorola's 68360 Quad Integrated Communications Controller (QUICC) multiprotocol engine. Its use of a leading edge communications processor and VME-64 interface silicon
