## PC DH485 Interface Module

(Cat. No. 1784-KR)

### To the Installer

If you are using the 1784-KR interface module with the 1747-PA2E Advanced Programming Software (APS), you need to install the Host PC software to interface the 1784-KR to the APS. Follow the instructions below to do this.

### Installing the 1784-KR Module Host Software

The 1784-KR Host Software lets the APS communicate over the DH485 network using the 1784-KR module instead of the personal computer's serial communication port. To install the 1784-KR Host software:

1. Complete the hardware installation of the 1784-KR hardware in your PC system (See the PC DH485 Interface Module Installation Data, publication 1784-2.23, for details.)
2. Complete the software installation of the 1747-PA2E Advanced Programming Software (See the 1747-PA2E Advanced Programming Software user's manual, publication 1747-NM002, for details.)
3. Change to the directory where you installed the **aps.exe** file. The default location for the **aps.exe** file is `\ipds\attach\slc500`. To change to the default directory, type:

```
cd\ipds\attach\slc500 [Return]
```

4. Copy the **dh485cdl.exe** file from the 1784-KR Host software diskette:
  - a. Place the 1784-KR Host software disk in your system's floppy disk drive.
  - b. Type the following (we assume you are using disk drive A):

```
copy a:dh485cdl.exe kr.exe [Return]
```

This completes the installation of the 1784-KR Host software. When you start the APS package, you must configure the software before the 1784-KR module is used as the DH485 interface device.

**ALLEN-BRADLEY**  
A ROCKWELL INTERNATIONAL COMPANY

Allen-Bradley has been helping its customers improve productivity and quality for 90 years. A-B designs, manufactures and supports a broad range of control and automation products worldwide. They include logic processors, power and motion control devices, man-machine interfaces and sensors. Allen-Bradley is a subsidiary of Rockwell International, one of the world's leading technology companies.
