PRODUCT GUIDE

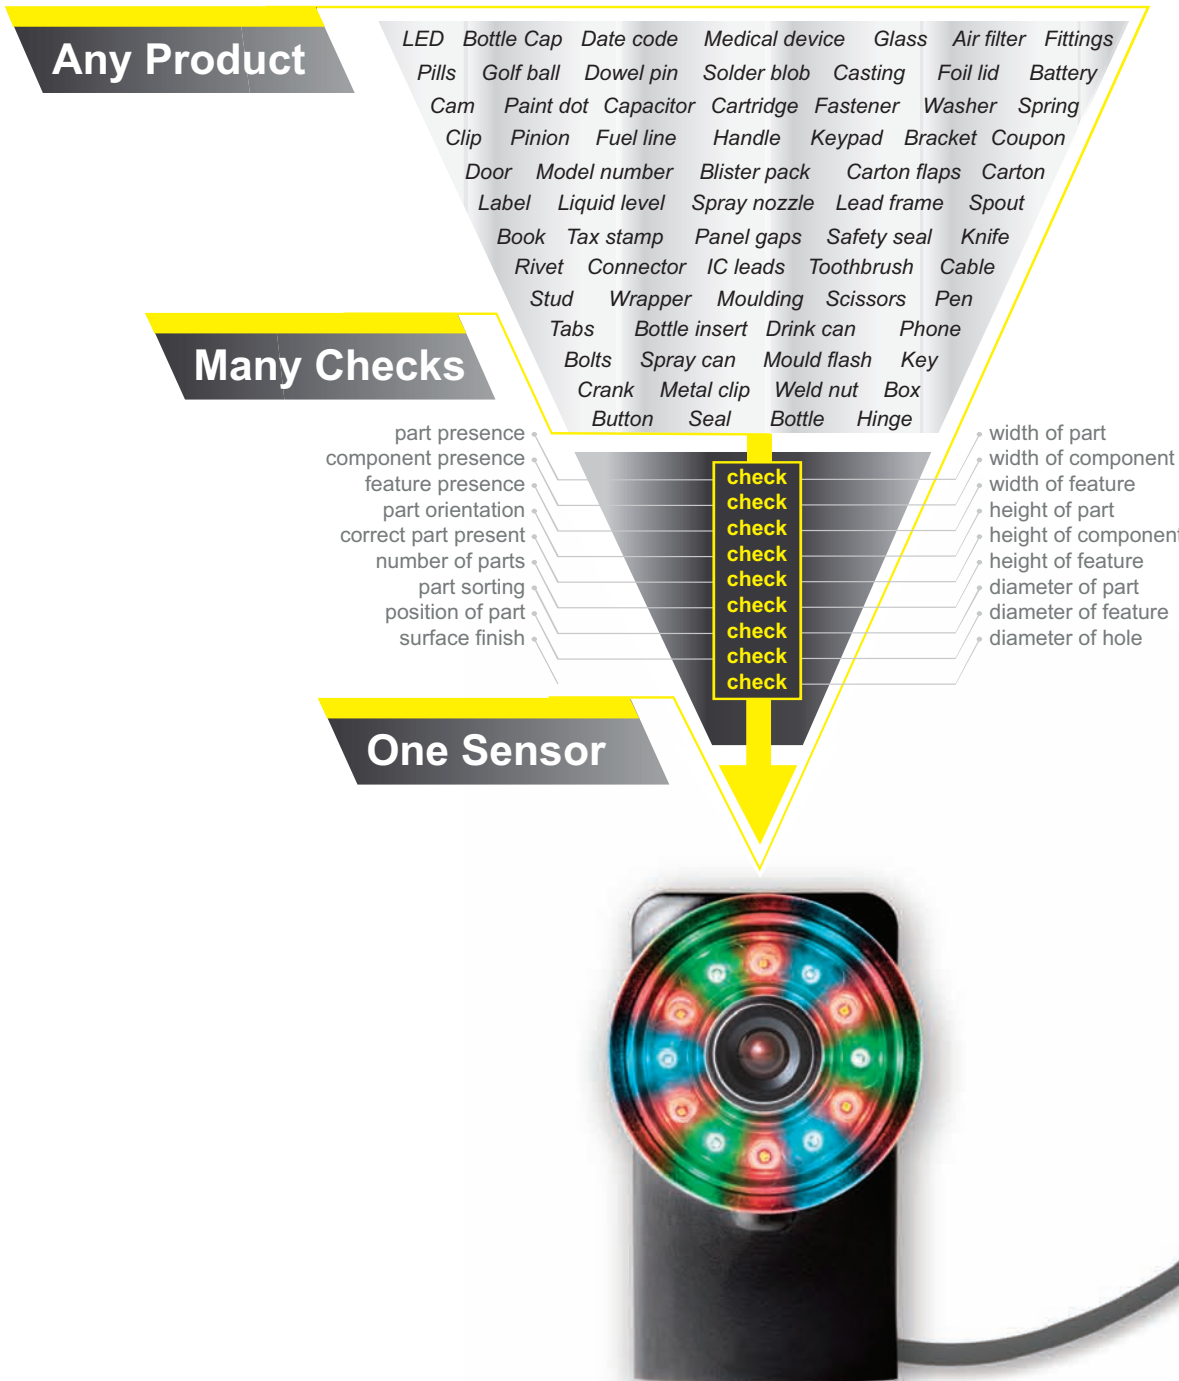

CHECKER Vision Sensors

One Sensor does it all — Checker 3G

One sensor does it all...

Wouldn't it be great if you could use the same sensor for all your product verification tasks? This is now possible with the new third generation Checker 3G from Cognex. With Checker 3G, you choose whether to use it as a Presence/Absence sensor or as a Measurement sensor. In either mode it can perform multiple "checks" on each product you manufacture. When designing Checker 3G, we threw away the sensor rule book, so you can throw away all those sensor catalogs.

and it's so simple to use

All you need to set up a Checker 3G is the SensorView® teach pendant. With our unique One-Click Setup™ feature, jobs can be set up and running in a matter of minutes. A single teach pendant can be used to set up any number of Checker 3G sensors, and can also be left connected for real-time application monitoring. With integrated part detection, lighting, I/O and job change, Checker 3G is the easy and affordable way to verify the products you manufacture.

SensorView®

Checker 3G makes it easy

- Integrated lighting freezes high speed movement
- Integrated I/O and remote job change facility
- Variable focus and wide range of working distances
- Rugged IP67 rated housing with threaded mounts
- Detects and verifies up to 6000 parts per minute
- Works with both moving or indexing production lines

One-Click Setup™

Simply click near the center of the feature that you want to verify and the "check" is automatically placed

Checker in Action

Automotive Industry. Checker 3G delivers reliable results by checking the:

- presence of weld nuts, o-rings, springs, fasteners and sealants
- orientation of parts on feeder bowls
- measurement of gaps, hole diameters, and springs

Food and Beverage Industry. Checker 3G helps improve quality by checking the:

- presence of laser/ink-jet codes, caps, labels and tamper seals
- verification of closed bags before sealing
- measurement of a product label, product, fill level and cap height

Consumer Products Industry. Checker 3G helps cut costs by checking the:

- presence of nozzles, coupons, safety seals and caps
- orientation of bottles, containers and flip caps
- measurement of component width, screw length and hole openings

No matter the industry, Checker 3G delivers reliable inspection results for manufacturers and machine builders.
