ELECTRONIC PACKAGING DIVISION

- 2.16 Packet Switch Compliant 8 Slot Backplane with CompactPCI, H.110, and IPMB buses
- 8HP Intel® Pentium® III Processor SBC
- Hard drive, CD, and floppy
- Your choice of OS (Windows 2000®, Windows NT®, Linux®, or Solaris®)
- Your choice of memory
- Layer 2 or 3 Switch Card

Carlo Gavazzi's FabricPac 6851 is a configurable, CompactPCI 8U rackmount/benchtop platform for Industrial, Datacom/Telecom, and Prototype applications.

The FabricPac 2.16 Packet Switch Fabric Ready Platform is a 19 inch rackmountable/benchtop chassis that can be configured to meet your CompactPCI Packet Switch Fabric needs. This system comes complete with an Intel Pentium III CompactPCI SBC, Layer 2 or 3 Switch Card, EIDE hard drive, CD, floppy drive, your choice of memory, and OS (Windows 2000, Windows NT, Linux, or Solaris). The FabricPac takes all the above components and wraps them into a NEBS-ready 505 Series enclosure. The 505 Series is 19" wide, 14" high, and 12" deep.

At the heart of the system is the all new FABRICON™ eight slot 2.16 Packet Switch compliant backplane. The chassis is designed to support Hot Swap, N+1 350W front pluggable power supplies with AC or DC input. A front pluggable positive pressure cooling scheme with two 12VDC 90 CFM fans and tach alarm output provides low MTTR and high reliability. Front panel controls/indicators include a DC inhibit switch, backplane voltage LEDs, and an ESD jack.

Scalable performance. Carlo Gavazzi's FabricPac 6851 Series Platform is designed to meet the needs of embedded and applied computing OEMs and System Integrators addressing worldwide datacom/telecom, CTI, industrial automation, military/aerospace, and medical markets.

—innovative engineering, dependable products—

Carlo Gavazzi Computing Solutions designs and manufactures standard and custom AdvancedTCA™, CompactPCI®, PCI/ISA, and Switch Fabric backplanes, cabinets, enclosures, I/O boards, and integrated systems that address your outsourcing and time-to-market needs.
