

## Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

### SERVICE CENTER REPAIRS

Experienced engineers and technicians on staff at our full-service, in-house repair center

### *InstraView*<sup>SM</sup> REMOTE INSPECTION

Remotely inspect equipment before purchasing with our interactive website at [www.instraview.com](http://www.instraview.com) ↗

### WE BUY USED EQUIPMENT

Sell your excess, underutilized, and idle used equipment. We also offer credit for buy-backs and trade-ins. [www.artisanng.com/WeBuyEquipment](http://www.artisanng.com/WeBuyEquipment) ↗

## **Press Release: VP PSE/P33**

---

### **- 700MHz Pentium® III single-slot VME CPU board**

*July 2000:* Concurrent Technologies has released its third single slot VME board based on Intel's new Flip-Chip Pentium III 700MHz processor. The VP PSE/P33 is a high performance, versatile CPU board, with a variety of extra features. It is an ideal choice as the central processing unit for applications in the telecommunications, defense, industrial, medical and aerospace markets.

The VP PSE/P33 is a superior performance, high functionality CPU board, supporting the new low-power Flip-Chip Pentium III processor which is based on Intel's 0.18 micron Coppermine technology and 100MHz system bus. The Pentium III has its own integrated Level 2 cache that operates at full CPU speed. In addition, the new Level 2 cache has been further improved due to Intel's implementation of its Advanced Transfer Cache, which provides a 256-bit data path, 8-way associativity and a reduced latency – all of these features further improve the Pentium III's performance and consequently the board's performance is also improved.

Reliability and maintainability are key design goals for all of Concurrent Technologies' products and to meet this design goal a passive heat sink is used in preference to a CPU fan; a single slot solution is also ensured.

The VP PSE/P33 is a PC compatible board. Additional features included on the board are high performance Ultra-SCSI/EIDE, 10 or 100Mbps Ethernet using a RJ45 connector, high resolution graphics, including support for flat panel displays, up to 256 Mbytes of DRAM and support for DiskOnChip®. On board fast hardware byte-swapping is also supported. In addition, the board offers PC-compatible features such as keyboard, mouse, USB, floppy disk and printer port.

These features can be further extended by the use of the on board PMC site, and a further 2 PMC modules can be added using an optional PMC carrier board which connects directly to the VP PSE/P33 via the PMC expansion interface. Additional optional products include a Mass Storage Module and CompactFlash™ module.

To ensure ease of integration, the board supports many of today's leading operating systems including Windows NT®, VxWorks®, Solaris™, Linux® and QNX®.

For further information on the VP PSE/P33, or any of Concurrent Technologies' range of VME boards, please contact:

The VP PSE/P33 available in July 2000.
