ACTIVE FILM Multiplier™

Varian Saturn 2000

ion-trap GC-MS

The **ACTIVE FILM Multipliers™** for the Varian Saturn 2000 ion-trap mass spectrometer is specifically designed for this instrument. It is a direct "plug-in" replacement electron multiplier and is fully compatible with Varian hardware and "Multiplier Setup" software.

ACTIVE FILM Multipliers™ are a new development in multiplier technology that incorporate totally air-stable "ACTIVE FILM" materials into a discrete-dynode multiplier design to produce an exceptionally sensitive ion detector with long operating life and excellent air stability. **ACTIVE FILM Multipliers™** give a combination of performance and durability unsurpassed by any other type of electron multiplier detector.

ACTIVE FILM Multipliers™ have higher gain than alternative multipliers resulting in consistently lower multiplier voltages. Their long operating lifetime means less frequent multiplier replacement and reduced instrument down-time.
