Product Details: IP-OCTAL-232

IP-OCTAL SERIAL

Product Description

The IP-Octal-232 IndustryPack module implements eight EIA-232 asynchronous serial ports, each with RXD, TXD, RTS, and CTS signals. In addition, eight general-purpose input lines are provided with TTL switching levels.

Serial ports are implemented with the Signetics SCC2698B octal UART. Each channel has a three-character FIFO on its receiver to allow longer interrupt servicing latencies. Eighteen programmable baud rates up to 38.4 kbps, and programmable bit length, parity, and stop bits are supported.

Four independent 16-bit timers are provided. The serial ports support automatic CTS control of the transmitter and change-of-state interrupts.

The IndustryPack Strobe* pin may be used as a clock input or output depending on the setting of user shunts.

Two serial channels may be configured for DMA use.

Warranty

3 years

Order Info

IP-OCTAL-232 : IndustryPack with eight EIA-232 async serial ports

PDF Data Sheet

SBS Communications Group designs, manufactures and markets high performance OEM telecommunications platforms and sub-systems for CompactPCI, PMC and PCI ranging from stand-alone single board computers and WAN adapters to chassis and industrial enclosures.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
