E1429A

Product Specifications

General

Number of channels: 2
Built-in DSP: No
Alias protection: Oversample
Basic accuracy: 0.5%
Low-Frequency CMRR: 68 dB
Variable bandwidth: External Filters
2 dB Input Range
headroom: No
Dual-Ported memory: No
Dual-Rate sampling: Yes

Sampling

Number of digitized bits: 12, including sign
Effective bits: 10 bits at 100 kHz; 9.5 bits at 10 MHz
(typical on 1 V range, 50 ohm input, full scale input)
Sample rates: 0.05 to 20 MSa/s in 1-2-5 sequence
Dual sample rate: switches between programmed rates upon receipt of arm

Memory

Memory length: 512 k readings per channel, battery-backed
Segmented memory: yes

Input

Input impedance: 50 or 75 ohm single-ended and 1 Mohm||20 pF differential
(both inputs on each channel, DC coupled, nominal)
Signal ranges: 50/75 ohm is 0.1 V to 1 V; 1 M ohm is 0.1 V to 100 V in 1-2-5 steps
Analog bandwidth: 50 MHz @ 1 V single-ended, 5 MHz @ 10 V differential, typical
Filtering: 10 MHz nominal, 2-pole Bessel, switchable
Signal to noise ratio: -62 dB typical

Timebase

Internal reference: 20 MHz,
50 ppm, <25 ps rms jitter typical
Reference sources: internal crystal, faceplate BNC, CLK 10, and ECLTRG
Timebase resolution: 50 ns

Arm and Trigger

(Each trigger event causes one A/D conversion in both channels ;
each Arm event allows acquisition of a burst of one or more dual-channel A/D conversions)
Programmable arm delay: 50 ns to 32 ms using internal 20 MHz reference
(derived from reference)

Readings per arm: 1, 7 to 16,777,215, or continuous post-arm; 0 or 3 to 65,535 pre-arm
Re-arm rate: up to 2 MHz (non-segmented memory)
Arm sources: internal, faceplate BNC, input voltage level, TTLTRG, ECLTRG, and logical OR of any two signals
Trigger (sample clock) sources: internal, VME read, faceplate BNC, TTLTRG, and ECLTRG
ECLTRG functions: arm, trigger, and reference (input and output)
TTLTRG functions: trigger and arm (input) arm and ready for trigger (output)

Connectors

EXT1 faceplate BNC: arm and trigger (input) arm, trigger and reference (output)
EXT2 faceplate BNC: trigger and reference (input)

VXIbus Compliance

Data paths: VXI word serial protocol on VXI data transfer bus or VME register access (16- or 32-bit; up to 4 or 8 MB/s)
Device type: message-based servant and register-based (A24) slave; A16/A24, D8/D16, D32 (data read only)

VXI Characteristics

VXI device type: Message-based
Data transfer bus: A24 slave; A16/A24, D8/D16, D32 data read only
Size: C
Slots: 1
Connectors: P1/P2
Shared memory: n/a
VXI busses: TTL Trigger Bus, ECL Trigger Bus
C-size compatibility: Yes

Command module

firmware: n/a
Command module
firmware rev: n/a
I-SCPI Win 3.1: n/a
I-SCPI Series 700: n/a
C-SCPI LynxOS: n/a
C-SCPI Series 700: n/a
HP VEE Drivers: Yes
VXIplug&play Win
Framework: Yes
VXIplug&play Win95/NT
Framework: Yes
VXIplug&play HP-UX
Framework: No (not available at time of publication)

Module Current

I_{PM} I_{DM}
+5 V: 2.9 0.5
+12 V: 0.2 0.04
-12 V: 0.2 0.04
+24 V: 0.1 0.05
-24 V: 0.1 0.05
-5.2 V: 3.6 0.05
-2 V: 1.2 0.12

Cooling/Slot

Watt/slot: 41.50

deltaP mm H₂O: 0.80

Air flow liter/s: 3.80

Backplane Connector Shielding

To ensure compliance with RFI levels specified in standards EN55001 and CISPR11, this product requires the Backplane Connector Shields installed in a VXI C-size mainframe. Option 918 is available with the purchase of a new mainframe; accessories, E1400-80920 and E1421-80920, are available for retrofitting existing mainframes E1401A/B and E1421B, respectively (one accessory per mainframe required).

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
