## MXI Interface for HP S/700

### + Software

#### Data Sheet

- Highest performance interface card for HP Series 700
- External controller flexibility
- Embedded controller speed
- Cross-platform compatibility
- Includes SICL and VISA I/O Libraries

Agilent E1489C

### Description

The Agilent E1489C EISA/ISA-to-MXIbus Interface **connects Hewlett-Packard 9000 Series 700 computers with EISA backplanes to the MXIbus.** This card, **not a VXI module**, plugs into EISA/ISA backplane of the controller. When used with SICL or VISA, the I/O Libraries for instrument control, HP 9000 Series 700 computers can talk directly to the VXI backplane. This gives you the advantages of external controllers, plus the speed and throughput of direct memory-mapped access to the VXI backplane.

SICL/VISA, included with the EISA/ISA-to-MXIbus Interface, provides ease of use and cross-platform compatibility. This compatibility means that application programs written for one platform can be recompiled and run on other platforms that use the same I/O library. The Agilent E1489C extends both the MXIbus and INTX (Interrupt and Timing Extension) buses.

The E1489C holds 1 or 4 MB of high-speed dual ported memory. The controller can access the A24 address space memory locally, and any VME or VXI card with direct backplane access can use it for temporary data storage or other uses. It has one SIMM connector and can hold either a 1 MB or 4 MB, 80 ns, no parity, PC-compatible SIMM module.

Refer to the Agilent Technologies Website for instrument driver availability and downloading instructions, as well as for recent product updates, if applicable.

### Improved System Control

Unlike other MXIbus interfaces, the E1489C extends both the MXIbus and INTX (Interrupt and Timing Extension) buses. INTX support gives better system control by direct access to the SYSRESET, SYSFAIL, and ACFAIL lines. Changes in system status can be transparently handled by the controller

**Agilent Technologies**  
Innovating the HP Way

and lock-ups eliminated. INTX support also gives better interrupt response time by direct connection to the seven VME/VXI IRQ lines and better triggering by direct interaction with the eight TTL trigger lines.

Related Products

The E1489C must be connected via MXI controller cable to the E1482B VXIbus Extender.

Product Specifications

Interface Characteristics	
Operating system:	HP-UX, 9.x, 10.01, 10.20
Controller:	Series 700
I/O library:	SICL/VISA
Backplane:	EISA
Max. I/O speed:	
16 bit:	2.0 MB/s
32 bit:	4.0 MB/s (with E1482B)
Languages:	C/C++, HP VEE
Communications:	Supports register-based, message-based, and shared memory communication
Multiple mainframe communications:	Supports transparent communication to one or more VXI cardages using the Agilent E1482B VXIbus Extender.

General Specifications

VXI Characteristics	
VXI device type:	n/a
Data transfer bus:	A16/A24/A32 D08/D16 (master/slave) D32 (master)
Size:	n/a
Slots:	n/a
Connectors:	n/a
Shared memory:	Yes (D08 and D16 only)
VXI busses:	n/a
C-size compatibility:	Yes

Ordering Information

Description	Product No.
MXI Interface for S/700 + Software	E1489C
Add'l 1 Meter MXI/INTX cable	E1489-61601
2 meter MXI/INTX cable	E1489C 002
If Ordered Separately	E1489-61602
4 meter MXI/INTX cable	E1489C 004
If Ordered Separately	E1489-61604
MXI/700 Hardware only	E1489C 005
DDS cartridge	E1489C AAH

Agilent Technologies’ test and measurement service/support  
commitment

Agilent strives to maximize the value our test and measurement products give you, while minimizing your risk and service/support problems. We work to ensure that each product is realistically described in the literature, meets its stated performance and functionality, has a clearly stated global warranty, and is supported at least five years beyond its production life. Our extensive self-help tools include many online resources ([www.agilent.com](http://www.agilent.com)).

Experienced Agilent test engineers throughout the world offer practical recommendations for product evaluation and selection. After you purchase an Agilent product, they can provide no-charge assistance with operation verification and basic measurement setups for advertised capabilities. To enhance the features, performance, and flexibility of your test and measurement products—and to help you solve application challenges—Agilent offers free or extra-cost product options and upgrades, and sell expert engineering, calibration, and other consulting services.
