Agilent I/O Connectivity

for easy PC-to-instrument connection

- Choose the best way to connect your PC to GPIB, USB and RS-232 instruments
- Take advantage of PC-standard interfaces (USB, LAN, PCI, PCIe)
- Add precise time stamping and time triggering capabilities to your instruments
- Protect your investment with industry-standard I/O software

Change your work, change your world

Agilent Technologies

Introducing Agilent I/O Hardware for PC-to-Instrument Connection

Agilent I/O hardware family benefits

- *Easy connection to GPIB, USB and RS-232 instruments* — Agilent I/O hardware products offer simple “plug-and-go” set up and configuration.
- *Use PC-standard interfaces* — Connect via your computer PCI/PCIe™ slot or use the built-in USB or LAN ports on your PC to connect to your instruments.
- *Choice of interfaces (GPIB, RS-232, USB, LAN, PCI, PCIe™)* — Agilent offers you a selection of products to meet your I/O needs. We work where you do!
- *Precise IEEE1588 PTP synchronization over LAN for your instruments* — with the E5818A LXI Class B trigger box
- *Use industry-standard I/O libraries* — The included industry-standard VISA I/O libraries make it easy for you to use your existing software programs and let you mix and match test instruments and software from different vendors in a single system.

Connecting is as easy as 1-2-3

Easily mix instruments from different vendors

Agilent IO Libraries Suite eliminates the headaches associated with trying to combine hardware and software from different vendors. The software is compatible with GPIB, USB, LAN and RS-232 test instruments that adhere to the supported interface standards, no matter who makes them.

When you install the IO Libraries Suite, the software checks for the presence of other I/O software on your computer. If it finds another vendor's VISA libraries (such as National Instruments), it automatically installs in a side-by-side mode that allows you to use your existing I/O software and the Agilent software together in multi-vendor systems without you being concerned with the behind-the-scenes details.

Work in the environment comfortable to you

In addition, the IO Libraries are compatible with a variety of application development environments and programming APIs including Agilent or NI VISA, VISA COM, SICL, and Agilent 488 (compatible with NI-488.2), giving you even more flexibility to choose the software and hardware from any vendor to get your job done.

Works with millions of existing instruments from hundreds of vendors

Use the most trusted and reliable technology for your connections. The IO Libraries Suite ships with more than 150 instruments from Agilent Technologies. It works with literally millions of existing instruments—helping you minimize the number of software packages you need. You won't have to switch between packages as you use a mix of existing and new instruments in the future.

Select the right connectivity for your need

	Model	Description	Recommended Use	Page
GPIB Boards	82350B	PCI High-Performance GPIB Interface Card	- Maximum GPIB throughput for all configurations - Adding GPIB connection for PCI-based PCs or workstations	3
	82351A	PCIe™-GPIB Interface Card	- Bandwidth-intense test applications - Adding GPIB connection for PCIe™-based PCs or workstations	5
USB Converters	82357B	USB/GPIB Interface	- Easiest GPIB connectivity to a PC via USB - Notebook computer GPIB connections	7

System Topology

Agilent I/O connectivity helps connect your instruments to PC easily, reliably and affordably. From legendary GPIB cables to the world's first LXI Class B triggering device, see how each provides seamless integration of your instruments no matter where they are placed in your system.

Agilent 82350B PCI High-Performance GPIB Interface for Windows®

*This traditional GPIB connection still
offers the highest throughput*

CE
ISM 1-A
N10149

Features

- PCI IEEE-488 interface for PCs
- Transfer rates up to 900 KB/s
- Dual-processor support on Windows 2000/XP/Vista
- Interface to 14 GPIB instruments (max)

Recommended use

- Maximum GPIB throughput for all configurations

High performance for manufacturing test applications

The 82350B is Agilent's highest-performance GPIB interface. With a direct PCI computer connection, transaction overhead is minimized for the best overall performance.

The 82350B card de-couples GPIB transfers from PCI bus transfers. Buffering provides I/O and system performance that is superior to direct memory access (DMA). The hardware is software configurable and compatible with the plug-and-play standard for easy hardware installation. The GPIB interface card plugs into a 5-volt PCI slot in the backplane of your PC.

For programming capability you have access with the latest version of IO Libraries suite, to program in all standard development environments. Agilent's IO Libraries Suite is easy to use and works with virtually any vendor's instrument or T&M programming software application. It is also able to automatically configure to work with NI-488.2 and Agilent's or NI's VISA, VISA COM and T&M Toolkit Direct IO. Even if you use NI's IO software, Agilent IO Libraries Suite will configure automatically so you don't have to be concerned with compatibility issues.

82350B technical specifications

General requirements	
Minimum system requirements	Windows 2000/XP/Vista
Software requirements	Agilent IO Libraries Suite (included) Please see requirements on page 18
PCI bus slot	5-V PCI slot, 32 bits
Supported standards	PCI rev 2.2 IEEE 488.1 and IEEE 488.2-compatible
General characteristics	
Power	Backplane +5 V PCI
Connectors	Standard 24-pin GPIB (IEEE-488) +5 V PCI
Maximum data rate	More than 900 KB/s
Maximum instrument connection	14 instruments—daisy chain via GPIB
Buffering	Built-in
Configuration	Plug-and-play
EMC and safety *	IEC 61326-1 Group 1, Class A IEC 61010-1
Warranty	1 year
Dimensions	
Length, width, and height	122 mm (L) x 122 mm (W) x 22 mm (H) (a full-height PCI card)
Weight	0.091 kg
Environmental specifications	
Operating environment	0 °C to 55 °C
Operating humidity	Up to 90% at 40 °C non-condensing
Storage environment	–40 °C to +70 °C
Storage humidity	Up to 90% at 65 °C non-condensing
Recommended accessories	
GPIB cables/adaptor (refer to page 18)	

Agilent 82351A PCI Express High-Performance GPIB Interface Card

*New standard for high-speed
internal devices*

Features

- Compact half-height size (68.9 mm)
- High transfer rate of 1.4 MB/s
- High flexibility via up-plugging (to x4 or x8 PCIe slots)
- 3.3 V signal level for lower power consumption
- Compatibility with industry standard PCIe™ rev 1.0a and IEEE-488
- Interface to 14 GPIB instruments (max)

Recommended use

- Bandwidth-intensive test applications
- Adding GPIB connection to PCIe-based PCs or workstations

High transfer rate for demanding test applications

Agilent 82351A PCIe-GPIB interface card is designed for integration into next-generation PCs or workstations. It offers fast data transmission for various demanding test applications to ensure data is not lost or overwritten during transfers to memory.

PCIe (PCI Express) is an evolutionary version of PCI that offers a higher transfer rate across a low number of wires. It is also backward-compatible with PCI software, so you don't need to perform any code re-configuration. PCIe's powerful bus architecture allows bi-directional data transmission, and the implementation of a new class of test applications.

82351A technical specifications

General requirements	
Minimum system requirements	Windows 2000/XP/Vista
Software requirements	Agilent IO Libraries Suite (included) Please see requirements on page 17
PCI bus slot	3.3 V PCIe slot, 32 bits
Supported standards	PCIe rev. 1.0a IEEE 488.1 and IEEE 488.2-compatible
General characteristics	
Power	Backplane +3.3 V PCIe
Connectors	Standard 24-pin (IEEE-488) +1.5 V PCIe
Maximum data rate	1.4 MB/s or better
Maximum instrument connection	14 instruments—daisy chain via GPIB
Buffering	Built-in
Configuration	Plug-and-play

Agilent 82357B USB/GPIB Interface

Boosting performance with the simplest connectivity

Features

- Fast and easy connection to GPIB instruments
- Uses standard USB and IEEE-488 interfaces
- Maximum GPIB transfer rate of more than 1.15 MB/s
- Use industry-standard software
- Parallel polling capability

Recommended use

- Easiest GPIB connectivity
- Notebook computer GPIB connections

Connect GPIB instruments quickly and easily to your computer's USB port

The Agilent 82357B USB/GPIB interface provides a direct connection from the USB port on your desktop and laptop computers to GPIB instruments. Once the software is loaded, your computer automatically detects the 82357B when it is connected to the computer USB port.

With the 82357B USB/GPIB interface and its convenient plug-and-play feature, you just plug and go. It is also hot pluggable, making it easy to connect and disconnect without having to shut down the computer. No external power supplies are necessary.

The 82357B USB/GPIB interface implements USB 2.0 (480 Mbits/s) and is backward compatible with USB 1.1. The 82357B USB/GPIB interface uses a thin, flexible, high-quality USB cable that is USB 2.0-compliant. The USB cable is shielded, and the connector is specified to 1,500 insertions, ensuring a durable connection and reliable data transfer.

82357B technical specifications

General requirements	
Minimum system requirements	Windows 2000/XP Professional/Vista 450 MHz Pentium II (800 MHz is recommended) 128 MB RAM (256 MB or greater is recommended) 400 MB free disk space USB port (OS and Microsoft®.NET Framework may require more resources)
Software requirements	Agilent IO Libraries Suite (included) Please see requirements on page 18
Supported standards	USB 2.0 high speed and full speed Standard USB endpoints supported IEEE-488.1 and IEEE-488.2 compatible SICL and VISA 2.2
Unsupported GPIB modes of operation	Pass control Non-system controller mode
General characteristics	
Power	USB bus-powered device, +5 V, 500 mA (max), 200 mA (typ)
GPIB transfer rate	1.15 MB/s or better
Connectors	Standard 24-pin IEEE-488 Standard USB A
USB hubs	Self-powered hubs
Parallel polling	A single parallel poll can easily check up to eight individual devices at once, corresponding to the number of data lines on the GPIB
Cable	2.5-meter, shielded connector rated for 1500 insertions
LED indicators	READY, ACCESS, FAIL
Maximum connections	Maximum of 4 converters can be connected to the PC
Instrument connections	14 instruments—daisy chain via GPIB
Configuration	Plug-and-play
Warranty	1 year
EMC and Safety *	IEC 61010-1:2001/EN 61010-1:2001 Canada: CSA C22.2 No. 61010-1:2004 USA: UL 61010-1:2004
Dimensions	
Length, width, and height	105 mm (L) x 64 mm (W) x 30 mm (H) (includes connectors)
Weight	215 grams
Environmental specifications	
Operating environment	0 °C to 55 °C
Storage environment	–40 °C to +70 °C
Operating humidity	Up to 90% at 40 °C non-condensing
Storage humidity	Up to 90% at 65 °C non-condensing

[1] If you're using Agilent IO Libraries Suite 15.0 or higher, you're not required to install the driver separately as it would come built into the Suite.

Agilent E5805A USB/4-Port RS-232 Interface*

Turn your USB port into four additional RS-232 ports

Features

- Easy connection for a standard USB port on your PC to up to four RS-232 instruments or devices
- Fully compatible with Windows COM driver and industry-standard VISA I/O software
- No switches to set, no PC cards to install, no external power supplies

Recommended use

- Addition of RS-232 connections to a PC

Add four serial ports in minutes

The Agilent E5805A USB/4-port RS-232 interface provides a direct connection from the USB port on your notebook or desktop PC to up to four RS-232 instruments or devices. There are no switches to set, no PC cards to install, and no external power supplies required. Simply install the driver and plug in the E5805A to your PC.

Since the E5805A is a standard plug-and-play device, your computer automatically detects and configures it when it is connected to your computer USB port. You can interface up to four devices, with baud rates up to 230 Kb/s per serial port. The E5805A provides four DB9 serial connectors and ships with a 1.8-meter USB cable.

* Not available in some countries. For enquires, kindly contact your Agilent sales representative.

E5805A technical specifications

General requirements	
Minimum system requirements	Windows 2000/XP B USB port
Software requirements	E5805A driver (included)
Software recommendation	Agilent IO Libraries Suite (included); Please see requirements on page 18
Supported standards	USB 1.1 (fully compatible with USB 2.0) EIA-232
General characteristics	
Power	USB bus-powered device, +5 V, 500 mA (max), 200 mA (typ)
Support for USB hubs	Self-powered hubs
Connectors	Standard USB A, RS-232 (9-pin) on each port
Cable	1.8 meter USB, USB A (host side) to USB B (device side)
Maximum data rates	230 Kb/s per port
RS-232 baud rates	300, 1200, 2400, 4800, 9600, 19200, 38400, 57600, 115200, 230400 b/s
RS-232 flow control	None, RTS/CTS, XON/XOFF, DTR/DSR
RS-232 parity	None, Odd, Even, Space, Mark
RS-232 bits	5, 6, 7, 8
RS-232 stop bits	1, 2
RS-232 SRQ interrupts	on RI, DSR, DCD, CTS (using IO libraries)
Maximum instrument connections	4 RS-232 instruments/devices
Configuration	Plug-and-play
Indicators	Tri-state LED displays device status and COM port activity
EMC and safety *	CISPR 22 Class B CISPR 24 IEC 60950
Warranty	1 year
Dimensions	
Length, width, and height	111 mm (L) x 183 mm (W) x 26 mm (H)
Weight	0.311 kg
Environmental specifications	
Operating environment	0 °C to 55 °C
Operating humidity	Up to 90% at 40 °C non-condensing
Storage environment	–40 °C to +70 °C
Storage humidity	Up to 90% at 65 °C non-condensing

Agilent E5810A LAN/GPIB Gateway

 ICES/NMB-001

Take advantage of LAN technology for your GPIB instruments and test systems

Features

- Remote access and control of GPIB and RS-232 instruments via LAN
- Easy set up and use via digital display and Web browser

Recommended use

- Connection to remote GPIB and RS-232 instrumentation
- LAN distributed system

Remote access and collaboration with GPIB instruments via your LAN

The Agilent E5810A LAN/GPIB gateway provides a high-performance solution for remote access of GPIB and RS-232 test instruments over your standard LAN.

The Agilent E5810A can use DHCP, if available, to automatically configure necessary network parameters, including its IP address. The gateway can be controlled from multiple locations and by multiple users via your LAN, so it is easy to share the control of instruments from locations worldwide.

Remote access of GPIB and RS-232 instruments with the E5810A is easy. First, enter its IP address (as displayed on the instrument) into any Web browser to gain access to the connected instruments. Then, use your Web browser to send instrument commands interactively and you are able to view your measurement results right away. You can use the digital display and LEDs to check the IP address and troubleshoot locally.

You can access programming capability in all standard development environments with the latest version of IO Libraries Suite.

System use

For system environments, the E5810A gateway can be rack-mounted. The rack mount kit (Option 100) allows two devices to be placed side-by-side in one rack width. For guidelines to select the appropriate I/O hardware for a remote connection, see page 2.

E5810A technical specifications

General requirements	
Minimum system requirements	Available 10BASE-T/100BASE-TX LAN port (client computers) Windows 2000/XP/Vista
Supported Web browsers	Internet Explorer 4.0 or higher Netscape Navigator 4.7 or higher
Software requirements	Web browser Agilent IO Libraries Suite (included) Please see requirements on page 18
Supported standards	IEEE 488.1 and IEEE 488.2-compatible 10BASE-T/100BASE-TX networks VXI-11 protocol EIA-232
General characteristics	
Power supply	100–240 V $\pm$ 10%
Power consumption	(7 watts) 25 VA peak
Power line frequency	47 to 63 Hz
Connectors	Std 24-pin GPIB (IEEE-488), RS-232 (9-pin), LAN RJ-45
Maximum data rates	More than 900 KB/s—GPIB port 115 Kb/s—RS-232 port
RS-232 baud rate	300, 1200, 2400, 4800, 9600, 19200, 38400, 57600, 115200 b/s
RS-232 flow control	None, RTS/CTS, XON/XOFF, DTR/DSR
RS-232 parity	None, Odd, Even, Space, Mark
RS-232 bits	5, 6, 7, 8
RS-232 stop bits	1, 2
RS-232 SRQ interrupts	on RI, DSR, DCD, CTS
Max instrument connections	14 instruments—daisy chain via GPIB 1 RS-232 device Up to 16 simultaneous I/O connections
Indicators	LEDs for Power, Activity and Fault
EMC and safety *	IEC 61326-1 Group 1, Class A IEC 61010-1
Warranty	1 year
Network protocols	See the E5810A User's Manual for supported network protocols and functions

Agilent E5813A Networked 5-Port USB Hub*

Utilize LAN to access remote USB, GPIB or RS-232 instruments or devices

Features

- Maximum connected instruments: 5
- Maximum data transfer rate: 12 Mbps per port
- Fully compatible with USB 1.1, USB 2.0 and 10BASE-T/100BASE-TX standards
- Extend USB devices beyond five meters

Recommended use

- Remote access to USB-based devices or instruments
GPIB and RS-232 devices can be connected to the E5813A through the 82357B and E5805A converters respectively.
- Sharing of instruments in a distributed system

Connect remote USB, GPIB or RS-232 instruments or devices via a standard LAN

The Agilent E5813A networked 5-port USB hub uses LAN technology to overcome the 5-meter distance limitation for USB cabling, so you can place USB devices anywhere on a LAN network. With access to remote devices, you can conveniently collect data, perform measurements, or monitor the progress of your tests. Using the included IO Libraries suite, you can connect an Agilent 82357B USB/GPIB interface to one of the USB ports for access to GPIB devices. You can also connect an E5805A USB/4-port RS-232 interface for access to RS-232 devices (see figure on page 3).

To prevent access conflicts, only one computer at a time can access the E5813A. The included software lets you lock the E5813A to your computer. Once you unlock the connection, another user can then connect from a different computer.

For information on choosing between the E5810A and E5813A see page 3.

* Not available in some countries. For enquires, kindly contact your Agilent sales representative.

E5813A technical specifications

General requirements	
Minimum system requirements	Windows 2000/XP Available USB 1.1 or 2.0 port
Software requirements	E5813A driver (included)
Software recommendation	Agilent IO Libraries Suite (included) Please see requirements on page 18
Supported standards	10BASE-T/100BASE-TX networks USB 1.1 (fully compatible with USB 2.0)
General characteristics	
Power supply	External switching AC adapter
Input power consumption	120/230 volts AC, 0.7amps
Power line frequency	50 to 60 Hz
Output	5 volts DC, 3 amps max
USB device power available	500 mA per device
Connectors	LAN RJ-45 Standard USB A on each of 5 ports
Maximum data rates	12 Mbps from each port
Maximum instrument connections	5 USB instruments or devices
Configuration	Remote LAN configuration utility
Indicators	LEDs for system and device status
EMC and safety *	CISPR 22 Class B CISPR 24 IEC 60950 ITE equipment intended only for use with ISM equipment
Warranty	1 year
Network and device recommendations	
IP addresses	One IP address per unit
E5813A device sharing	Locked to one computer at a time. One computer must release the E5813A before another computer can use it.
Network utilization	Maximum network utilization below 50%
Compatibility	Compatible with bulk or interrupt-type USB devices; isochronous devices are not supported.
Dimensions	
Length, width, and height	Device: 112 mm (L) x 182 mm (W) x 26 mm (H) Power adapter: 110 mm (L) x 60 mm (W) x 35 mm (H)
Weight	Device: 0.284 kg Power adapter: 0.25 kg
Environmental specifications	
Operating environment	0 °C to 55 °C
Operating humidity	Up to 90% at 40 °C non-condensing
Storage environment	-40 °C to +70 °C
Storage humidity	Up to 90% at 65 °C non-condensing
I/O Connectivity Options	Agilent 82357B USB/GPIB interface (refer to page 8)

E5818A LXI Class B Trigger Box

ICES/NMB-001

Add to your instruments precise synchronization over LAN in the nanosecond range

Features

- Nanosecond synchronization with IEEE 1588 PTP
- Easier troubleshooting with event time stamping
- Peer-to-peer & multicast communication capabilities
- Easy upgrade and configuration remotely with a Web browser

Recommended use

- Precise synchronization over LAN for LXI Class C and GPIB instruments

Accurate synchronization, easy data correlation

Accurate synchronization is crucial, especially in automated test systems that involve multiple distributed devices. When an LXI Class C or GPIB instrument is connected to the Agilent E5818A LXI trigger box, it gains the timing capabilities of an LXI Class B instrument.

Leveraging the IEEE 1588 precision time protocol (PTP) synchronization, the trigger box enables nanosecond (up to 13 ns standard deviation over direct connection) time triggering and time stamping of events (up to 5000) for the attached instruments. With reliable event-log data, users can trace and troubleshoot faults easily.

Peer-to-peer and multicast communication capabilities improve test time, especially when heavy data exchanges occur between devices. Further reducing test time, the trigger box can be easily configured and upgraded through a standard Web browser.

Every trigger box provides BNC connectivity to two instruments. It is also SCPI-compatible and includes a bundled IVI driver.

E5818A technical specifications

General requirements	
Minimum system requirements	Available 10BASE-T/100BASE-TX LAN port (client computers) Windows 2000/XP/Vista 450 MHz Pentium II (1 Ghz 32-bit (x86) is recommended for Vista) 128 MB RAM (512 MB is recommended for Vista). OS and Microsoft .NET Framework may require additional resources) 400 MB free disk space
Supported Web browsers	For the E5818 Web access: Internet Explorer 6.0 or higher, or Firefox 2.0 or higher
Software requirements	Agilent IO Libraries Suite (included) Please see requirements on page 18
Supported standards	VXI-11 Protocol IEEE-488.2 Compatible 10BASE-T/100BASE-TX Networks EIA-232 LXI Standard Revision 1.1 IEEE 1588-2002
Programming language	SCPI command IVI-COM Web Controller
General characteristics	
Time stamp input	Input has TTL compatible logic levels
Time trigger output	Output provides TTL compatible logic levels
Periodic trigger of 1 pulse per second (1 PPS)	For synchronization diagnostic use only. Issuing 1 Hz signal at 1 TTL output level (rising edge).
AC input	Input voltage range: 100–240 V $\pm$ 10% at 47 to 63 Hz Power: 25 VA peak (7.5 Watt typical)
Dimensions	With bumper: 227.3 mm (W) x 237.4 mm (L) x 59.3 mm (H) Without bumper: 212.3 mm (W) x 230.4 mm (L) x 43.25 mm (H)
Weight	3.085 kg
Rack mount kit dimensions	Full rack: 242.8 mm (W) x 238.05 mm (L) x 43.25 mm (H) Half rack: 27.5 mm (W) x 226.2 mm (L) x 43.25 mm (H)
Indicators	PWR, LAN, 1588
General system specifications	
Internal timer resolution	20 ns
TCXO characteristic	
Frequency	50 MHz
Initial accuracy	$\pm$ 2.0 ppm
Aging per year	$\pm$ 1.0 ppm
Temperature stability (0 to 55 °C)	$\pm$ 2.5 ppm (–30 to 75 °C)
1588 synchronization accuracy	
1.5 m Ethernet Direct Connection	+/- 2 ns mean, 10 ns standard deviation
Through IEEE 1588 boundary clock ^[1]	+/- 3 ns mean, 17 ns standard deviation
Via switch	+/- 12 ns mean, 11 ns standard deviation
Time stamp system specifications (EXT1, EXT2)	
Time stamp latency	62 ns
Time stamp resolution	Min: 100 s Max: N/A
Time stamp polarity	Rising or falling edge
Minimum pulse width	20 ns

GPIB Cables and Adapter

Cables

Agilent also offers a variety of cables that provide easy and reliable connections. Agilent cables are engineered for high reliability and durability, even under harsh conditions.

Cable	Length
10833D GPIB cable	0.5 m
10833A GPIB cable	1 m
10833B GPIB cable	2 m
10833C GPIB cable	4 m
10833F GPIB cable	6 m
10833G GPIB cable	8 m

Adapter

The 10834A GPIB-to-GPIB adapter can help when limited rear-panel space and other design considerations make cabling difficult. The 10834A adapter extends the first cable to 2.3 cm away from the rear panel to provide clearance for other connectors, switches, and cables.

Agilent connectivity software

Agilent connectivity software helps you establish a connection in **less than 15 minutes**.

Agilent IO Libraries Suite eliminates the hours of effort it takes to connect and configure PC-controlled test systems. This connectivity software ships with each Agilent I/O product and over 150 Agilent test and measurement instruments. Connecting your instruments to a PC is as easy as connecting a PC to a printer — even if you use multiple instruments from different vendors.

Now the enhanced version 15.0 or higher is with expanded compatibility with other vendors' IO software. You can now use any programming API with any standard T&M software development environment. Simply install Agilent's IO libraries Suite on your PC, then cable the interfaces and instruments to your PC. The IO Libraries Connection Expert utility will find the interfaces and instruments connected to your computer and configure them properly.

System Requirements; Agilent IO Libraries version 15.0

PC software

Operating system

- Windows Vista (32-bit Business, Ultimate or Enterprise Editions)
- Windows XP Pro or Home edition service pack 2 or later
- Windows 2000 Pro service pack 4 or later

Note: For use with Windows ME or Windows 98 (SE) use Agilent IO Libraries version 14.0

PC hardware

- Processor: 450 MHz Intel Pentium® class (800 MHz or greater recommended)
- RAM: 128 megabytes (MB) (512 MB or greater recommended)
- Hard disk space required: 280 MB
- Display: 800 x 600, 256 colors
- Input device: Microsoft mouse or compatible pointing device
- Device for installation: CD-ROM
- Web connection for upgrades and drivers

If you already own an Agilent I/O product or instrument, you can download the latest version of Agilent IO Libraries Suite at no cost.

Measurement Automation— Quick and Easy

Whatever instrument you're programming—whether an RF analyzer, oscilloscope, power supply or DMM—Agilent VEE graphical language software and I/O connectivity provide you the ease and flexibility to set up and automate the way you want for your application need. Make measurements quickly, easily and affordably today.
