Model 3050 provides power and mounting for two KIV-7M encryption devices in a package designed for tactical use. The Model 3050 features dual hot-swappable redundant power supplies, providing highly reliable uninterrupted service. Power supplies automatically adjust to a wide range of AC voltage inputs for worldwide applications. Internal cabling converts the KIV-7M VHDCI-68 signal interface connections to COTS standard EIA-530 (DB-25) connections on the rear panel. Extended internal cable length allows for easy insertion or removal of the KIV-7M device through the front of the chassis. The Model 3050 occupies two EIA standard 19" rack units (RU).

Key Features

- Mounts in a standard 19" EIA equipment rack
- Cable interfacing is made to EIA-530 DB-25 connectors on the integrated rear panel
- Auto-ranging, redundant, removable, hot-swappable internal power supplies
