ACC-26A

Serial Communication Optical-Isolation/Adapter Board

Part Number: 602213

Features & Options

PMAC's Accessory 26A is a serial communication optical isolation board for all versions of PMAC. The ACC-26A Option-1 can be used for optical isolation of the host computer's RS-232 to PMAC's RS-422 connector J4 (this is suitable for the PMAC-PC, PMAC-VME, and PMAC-LITE). ACC-26A Option 2 is suitable for the Mini-PMAC. Option 2 simply acts as an optical isolation board between the host's RS-232 and the PMAC's RS-232 connectors. ACC-26A Option 3 provides, through its J5 (JGEF) connector, optical isolation of the serial communication link between a host computer and the GE-FANUC series 90-70 PLC. ACC-26A Option 4 may be used for Delta Tau's other motion control cards (SMCC and MCC). The board comes with a standard DIN-rail mounting system, or you can use the four corner holes to mount the board with standoffs. Both DB-9 and DB-25 connectors are provided for host connection.

Options:

- Option-1: Host RS-232 to PMAC RS-422, w/26-pin 60-cm (24") cable
- Option-2: RS232 to RS232 optical isolation w/10 pin 24" cable
- Option-3: RS232 to RS422, (GE Fanuc Series 90-70 PLC)

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
