Portable Pipet-Aid® XP

- The lightweight, compact Portable Pipet-Aid®
- Three-speed settings provide more precise control for both aspirate and dispense modes
- Easy access battery replacement
- EZ Grip™ nosepiece with double membrane filter
- Removable stand
- Holster-type wall bracket included

Specifically designed to minimize operator fatigue, the Portable Pipet-Aid XP is smaller and lightweight. It accepts most pipets from 1 to 100 mL.

Each aspiration and dispense button has three speeds, (F) Fast, (M) Medium, (S) Slow. The medium speed is suitable for most routine techniques. *Fast* speed can deliver up to 50 mL in 5 seconds and can be used for rapid filling of large pipets or breaking up cell clumps. Slow speed is ideal when using small pipets or when more precise delivery is required. A gravity drain model is available which substitutes a gravity drain (G) function for the fast (F) mode on the dispense button.

The XP is powered by a 9 volt (Ni-MH) rechargeable battery.

A Tissue Culture Nosepiece, which features a unique filter element, will cease to allow air to pass in either direction if it becomes wet, alerting the user to possible contamination of the rubber insert.
