## IP-16ADC

IndustryPack® with 16 channel, 16-bit  
analog to digital conversion

---

### Features

- Up to 16 single-ended or eight differential 16-bit ADC channels
- Precision on-board reference
- Input ranges of 0-5V, 0-10,  $\pm 5V$ ,  $\pm 10V$
- 10  $\mu s$  conversion time
- Factory calibrated; data in ID PROM

The IP-16ADC provides 16 single-ended or eight differential channels of 16-bit analog to digital conversion on a single-wide IndustryPack. The single-ended and differential inputs may be mixed. A programmable gain amplifier provides a selection of input ranges. Conversions take place in less than 10  $\mu s$ .

Gain and offset calibration parameters are stored in the board's ID PROM.

Note that this product **requires** an external low noise  $\pm 15$  VDC power supply.
