# Ag Titrode

6.0430.100

## Feature overview

## Tech specs

Combined silver ring electrode with a pH glass membrane as reference electrode.

This maintenance-free electrode is well suited for precipitation titrations when the pH value remains constant (titrant silver nitrate) of, e.g.:

- chloride, bromide, iodide
- sulfides
- hydrogen sulfide
- mercaptans
- cyanides

This electrode is stored in deion. water.

Depending on the application, we recommend using an Ag Titrode with a coating (AgBr or Ag<sub>2</sub>S coating), which can be ordered accordingly.
