ANALOG RESISTIVE TOUCH SCREEN CONTROLLER BOARD

Auto Detect RS-232 and USB Communications and 4, 5 AND 8 WIRE

Product Description:

General Specifications:

TSHARC-12 "DEVIL RAY"

Touch Screens: Auto Detect all analog resistive 4, 5, and 8 wire
Resolution: 12 bit (4,096 x 4,096)
Communications: Auto Detect: RS-232 and USB communication
Com Protocol: Hampshire Standard
Size: 2.11" x .96"

Connector Types

Touch Screen Side: .100" Rt. Angle Header
Flat Flex: 1mm 4 position flat flex
Com Side: .100" Rt. Angle Friction Lock Header

Sample Rate: Dynamic: 40 - 125 pts/sec or fixed > 100pts/sec.
Baud Rate: 9600 default, 2400 & 19.2 user configurable.
Voltage Required: 5.0Vdc +/- 5% or from USB port
Environmental: Storage: -40c - 85c, Component rated: -40c - +85c
Static Protection: 24 KVA
PC Board UL File: See Figure Below
Connectors UL File: See Figure Below
Part Number: HS12-0x0E0A-03

The Devil Ray touch screen controller is designed to provide high performance, low cost, concurrent touch screen decoding for all 4, 5 and 8 wire analog resistive touch screens regardless of manufacturer or construction.

The auto-detect features of this controller enable it to auto-detect and configure itself for both RS-232 and USB communications. In addition, the Devil Ray will auto detect and configure itself for any analog resistive touch screen using either one of the two industry standard 4 or 5 wire pin-outs or any one of three industry standard 8 wire pin-outs.

The TSHARC-12 Devil Ray supports 12-bit (4,096 x 4,096) resolution which will perform well in all writing or touch applications.

Hampshire's propriety, **flash updateable** firmware will dynamically determine the best possible sample rate and sensitivity settings for all touch screen characteristics and application. The sample rate may also be set for 100 points/second if that's a requirement of your application.

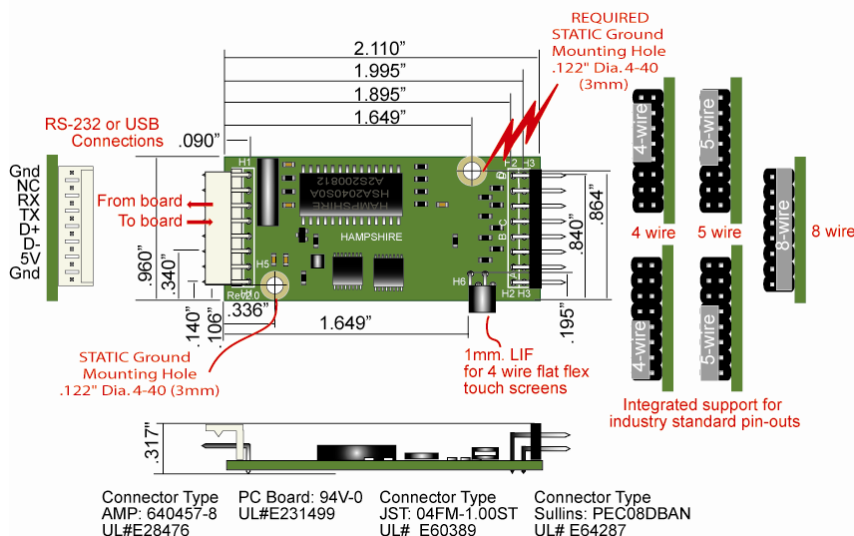

For embedded applications, Hampshire's "Chip and Driver" solutions are true "Single Chip" solutions. These solutions dynamically support USB, RS-232, PS/2, TTL and SPI communications for 4, 5, or 8-wire analog resistive touch screens and include all Hampshire device drivers and technical support.

All Hampshire products and associated device drivers are developed and supported in house by Hampshire engineers. Custom firmware and drivers are available upon request. For additional information about this product and other Hampshire products please visit:
