open industrial communication concept

applicom international
opening up the industrial communication univers

applicom® PCI1500PFB

Based on a unique industrial communications concept, applicom® is the fastest, open, trouble-free approach for interfacing PC-based applications (HMI, SCADA, MES, RDBM, spreadsheets, custom applications) and devices (PLCs, I/O modules, etc.) on fieldbuses and industrial networks.

The applicom® software package includes:
- Configuration software.
- Powerful test and diagnostic tools.
- Data servers (OPC, ActiveX, DDE, FastDDE, SuiteLink).
- Development libraries for programming languages such as Visual C/C++, Visual Basic, Delphi, Borland, Windev, Labwindows CVI, LabVIEW...

Thanks to smart technology, all applicom® communications processors are able to execute all management and the processing (polling, frame management, etc.) of communications protocols, resulting in extremely fast, efficient application performance.

Particularly, the applicom® **PCI1500PFB** board is equipped with **1 Profibus port.**

applicom international is a member of **PTO** (**P**rofibus **T**rade **O**rganization) and **PNO** (**P**rofibus **N**utzer**o**rganisation e.V.).
