Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

SERVICE CENTER REPAIRS
Experienced engineers and technicians on staff at our full-service, in-house repair center

WE BUY USED EQUIPMENT
Sell your excess, underutilized, and idle used equipment
We also offer credit for buy-backs and trade-ins

Stepper and Servo Motor Drives

NI MID-7604, NI MID-7602
- High-efficiency, bipolar chopper stepper drives
- User-selectable microstepping and peak current
- Integrated power supply
- CE approved and UL recognized

NI MID-7654, NI MID-7652
- High-efficiency servo amplifiers
- User-selectable peak current and continuous current
- Integrated power supply
- CE approved and UL recognized

Overview and Applications
The National Instruments MID-760x integrated stepper motor power drives and MID-765x integrated DC-brush servo motor power drives offer reliable, easy-to-connect drive solutions for National Instruments motion controllers. The NI MID-760x provides stepper motor control from the NI 7330, 7340, and 7350 controllers. The MID-7650 provides DC-brush servo motor control from NI 7340 and 7350 controllers. Because the MID-760x and the MID-7650 have all the required motion drive and motion I/O signals, they offer all the features of a universal motion interface wiring module with the enhancements of a powered motor drive in a single product. The NI MID power drives connect to motion controller boards through a single-shielded cable that transfers all motor commands, as well as motion I/O control and feedback signals.

The MID-7604 and MID-7602 are 4-axis and 2-axis stepper motor drive units, respectively. The MID-7654 and MID-7652 are 4-axis and 2-axis DC-brush servo motor drive units, respectively. These compact, well integrated drives incorporate per-axis amplifiers, motor-power DC bus supplies, low-voltage motion I/O supplies, and pluggable screw terminal connectivity in a single rugged metal enclosure. This optimized system wiring design simplifies motion component selection.

High-Efficiency Architecture
The MID-760x power drives incorporate an efficient bipolar chopper architecture that converts step and direction control signals into winding currents for 2-phase stepper motors. The MID-765x power drives incorporate an efficient servo amplifier architecture that converts analog control signals into winding currents for DC-brush motors. The pulse width modulation driver technology in the MID-765x accurately controls motor winding current, while reducing motor heating, lowering ripple current, and improving overall motor performance. Active fan cooling provides optimal motion power drive operation.

BUY ONLINE!

Visit ni.com/info and enter mid7602, mid7604, mid7652, and/or mid7654.

Specifications

The specifications below apply to only the MID-76xx. Please refer to your controller specifications to determine overall system specifications.

Some signals define compatibility as pass-through. This means the MID-76xx may have passive filtering on these signals, but the signals do not affect the voltage range. Consult your motion controller specifications to determine allowable voltage range and logic level compatibility of the signal.

MID-7604, MID-7602 Stepper Motor Drives

Driver type: IM481H modular hybrid, bipolar chopper
Chopping operating frequency: 20 kHz
Motor bus voltage: 24 VDC nominal
Current per phase: 0.2 to 1.4 Apeak (0.14 to 1 Aave) (factory setting is 0.2 Aave)
Microstepping selections: x2, x4, x8, x16, x32, x64, x128, x256
x5, 10, 25, 50, 125, 250

Power Supply

Input voltage: 90-138 VAC/208-264 VAC, 47-63 Hz
Input fuse: 1.5 A, 230 VAC
Input fuse dimensions: 3 A, 115 VAC
Input fuse dimensions: 5 x 20 mm

Host Bus Voltage Interlock

PC bus host voltage monitoring range: 5 VDC

Physical

Dimensions: 30.6 by 25.4 by 4.4 cm (12.1 by 10.0 by 1.7 in.)
Weight: 4.5 kg (10 lb)

Storage temperature: 0 to 50 °C for 765x, 0 to 45 °C for 760x
Relative humidity: 10% to 90% (noncondensing)

Environment

Operating temperature: 0 to 50 °C for 765x, 0 to 45 °C for 760x
Storage temperature: -20 to 70 °C
Relative humidity: 10% to 90% (noncondensing)

Installation category II, pollution degree 2

Safety

General (All MID 76xx drives)

Encoder Interface (Each Axis)

Inputs

- Differential input threshold: ±0.3 V (typical)
- Single-ended input threshold: TTL/CMOS
- Voltage range: 0 to 5 VDC
- Minimum quadrature frequency: 20 kHz

Inhibit, Limit, and Home Switch Inputs (Each Axis)

Voltage range: 0 to 12 VDC
Compatibility: Signal pass-through

Trigger Input

Noise filter (RC time constant): 100 ns
Compatibility: Signal pass-through

Breakpoint Output

Compatibility: Signal pass-through

Analog Input

Noise filter (RC time constant): 10 µs
Compatibility: Signal pass-through

Analog Output

Compatibility: Signal pass-through
