Artisan Technology Group

(217) 352-9330 | sales@artisanng.com | artisanng.com

- Critical and expedited services
- In stock / Ready-to-ship
- We buy your excess, underutilized, and idle equipment
- Full-service, independent repair center

Artisan Scientific Corporation dba Artisan Technology Group is not an affiliate, representative, or authorized distributor for any manufacturer listed herein.

Multi-Axis Tilt Platforms

These multi-axis tilt platforms provide tilt and rotation adjust optical components. They are kinematic in design, with hard contact points and spring-preloaded adjustments to eliminate

- Stable, kinematic designs
- 2 and 3-axis tilt and tilt/rotation versions
- Compatible with 423 & 433 stages
- Generous array of mounting holes

Features

Tip, Tilt and Rotation

Model 36

Model 37

Model 39

These multi-axis platforms provide tip, tilt and rotation adjustments for aligning optical components.

Model 36 has an elevation tilt adjustment and a rotation adjustment that rotates the mounting platform about the kinematic pivot point — ideal for use as a pointer.

Model 37 provides full, three-axis angular orientation freedom. When used with an XYZ stage, it provides six degrees of freedom for total positioning capability.

Model 39 provides two axes of angular adjustments, allowing a mounted component to be oriented parallel to an arbitrary plane.

Linear Stage Compatible

These tilt stages are ideally suited for mounting linear trans like the 423 and 443 to provide assemblies with full alignment. On the left, the 443 linear stage is mounted atop the Model 36 provides tip/tilt adjustment. On the right, Model 36 is mounted atop a stack of 423 linear stages.
