Multi-Axis Universal Motor Driver

Key Features

- 6 axes of DC and stepper motor driving in a rack-mountable enclosure
- 250x micro-stepping for vibration sensitive stepper motor applications
- Driver cards can be added or removed without the use of tools
- Modular driver design is easy to upgrade as needs change

The UNIDRIV6000 is a rack-mountable six-axis universal motor driver. Used in conjunction with Newport's ESP6000 motion controller, the UNIDRIV6000 can drive up to six-axes of motion using any combination of DC and/or stepper motors. A single, universal motor driver card capable of driving both DC motors up to 200 Watts and stepper motors with up to 250x micro-step resolution is used. The UNIDRIV6000 uses onboard intelligence to automatically identify and configure itself for up to six ESP-compatible motion devices. Front and back LED's display the status of each motor driver.

A modular configuration allows you to quickly add more axes in the future as your needs expand. Driver cards can be easily added to the UNIDRIV6000 by turning the captive thumb-screws to remove the axis cover plate and sliding a new driver card into place—no tools required.

ESP compatible universal motor drivers mean a single motor driver card is capable of driving both brushed DC and 2-phase stepper motors. When used with Newport's ESP6000 motion controller, the UNIDRIV6000 universal motor driver is plug-and-play compatible with all of Newport's motorized positioning devices except the PM500 family.

Specifications

Number of Motion Axes	One to six, single-motor driver cards—any combination of stepper and DC servo motors.
Motion Device Compatibility	All Newport motion devices using either stepper motors or encoder-equipped DC motors in any combination (except PM500)
Stepper Motor Controller Compatibility	Optically isolated +pulse, -pulse or pulse and direction input
Stepper Motor Driver/DC Motor Driver	4 A, up to 250x microstep for stepper motors. When used with the ESP6000 motion controller, the driver will automatically configure itself.
DC Motor Driver	24 V, 8 A maximum or 60 V, 3 A maximum
Power Requirements	115 or 230 V, 50/60 Hz 500 W maximum continuous driver load per 6 axes
Dimensions (4U Rack)	16.9 in. wide x 17 in. deep x (6.5 in. tall + 0.5 in. bottom clearance)
Weight	8 kg

Note 1: UNIDRIV 6000 cannot be used for RV120-350PEHL. Must use MM4005 for these stages.

Ordering Information

The UNIDRIV6000 part number is configured as follows:

Example:

UNIDRIV6000-OPT

	01	01	01	NN	NN	N	N
Axis 1 Driver Option	01	01	01	NN	NN	N	N
01 Driver							
NN No Driver							
Axis 2 Driver Option		01	01	NN	NN	N	N
01 Driver							
NN No Driver							
Axis 3 Driver Option			01	NN	NN	N	N
01 Driver							
NN No Driver							
Axis 4 Driver Option				01	NN	N	N
01 Driver							
NN No Driver							
Axis 5 Driver Option					01	NN	N
01 Driver							
NN No Driver							
Axis 6 Driver Option						1	N
1 Driver							
N No Driver							
Rack Mount Option							1
1 Rack Mount							
N No Rack Mount							

How to order

The UNIDRIV6000 is configured by first specifying driver options for each axis. The example above specifies a UNIDRIV6000 configured to operate with 3 axes.

The UNIDRIV6000-OPT can be bundled with the ESP6000-OPT at a reduced price. To order this combination, specify part number ESP6000-SYS-X, where X is the number of axes and drivers for the UNIDRIV6000 (from 1 to 6).

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
