## The Accessory 65ETH is now released!

### Ethernet Modbus TCP/IP I/O device

The ACC-65ETH is a boxed accessory with identical I/O capability to that of the 65M MACRO peripheral with 24 isolated self-protected digital inputs and outputs. These inputs and outputs are controlled via the Ethernet Modbus TCP/IP protocol. The inputs are either sinking or sourcing (by user wiring) at 12V to 24V levels. The outputs are sourcing, each at up to 24VDC with 600mA continuous and 1.2A peak for up to 2 seconds. An option for 2, 12 bit analog inputs and 2, 12 bit analog outputs with dry contact relay can be ordered to control one or two inverter drives with an analog speed reference.

This I/O module is an excellent way to expand I/O on any Delta Tau product that has an Ethernet connector. It is especially well suited for use with the Geo Brick and Geo PMAC programmable servo amplifiers.

Text Box:

### Features

- Ethernet Modbus TCP/IP link
- OPTO (Sourcing 24 in 24 out)
- Two 12-bit DAC outputs with 0 -  $\pm 10$ V voltage range
- Two 12-bit ADC inputs with 0 -  $\pm 10$ V voltage range
- Two relay contact outputs
- Two can be connected at one time to one of our Ethernet masters like the Geo Brick

The ACC-65ETH part number is 300-603830-10x

Delta Tau Data Systems, Inc.

# Artisan Technology Group is an independent supplier of quality pre-owned equipment

## Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

## We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
