SWITCHING

Multiplexer Module Model 1260-30

■ 1260-30 Configurable as Any of the Following Two-wire Networks:

One 1x40 multiplexer
Two 1x20 multiplexers
Four 1x10 multiplexers
Eight 1x5 multiplexers

■ 10MHz Bandwidth

The 1260-30 is a high power scanner/multiplexer configurable as eight 1x5, four 1x10, two 1x20 or one 1x40 two-wire multiplexer networks. The 1260-30 is ideal for switch applications where multiple channels have to be scanned or multiplexed on to a common bus. As is the case in scanning UUT test points with a DMM or in continuity testing.

Relay coil current monitoring is available to provide confidence checking which gives the user assurance of proper relay operation.

Mounting holes associated with each channel permit installation of user supplied components.

■ Switches up to 2A and 250V

■ High Power Multiplexer

■ Provides Circuit Pads for User Supplied Terminators

The 1260-30 is controlled by the Option 01 message-based interface which is explained in detail on the Smart Card Module page. All 1260 control features explained on that page are available to this module.
