EXP-BP2 Subplane

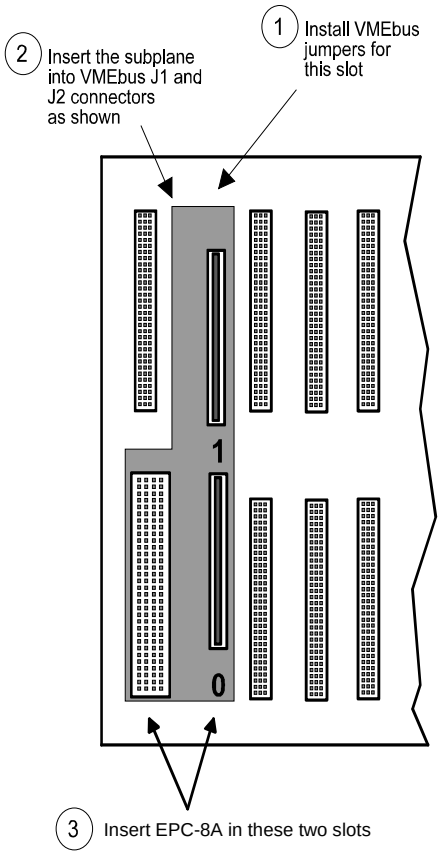

Figure E-2. EXP-BP2 Subplane

This subplane is to provide connectivity for the processor and two EXM modules.

The EXP-BP2 is an L-shaped board with three connectors on each side.

After jumpering the backplane, plug the subplane into the VMEbus backplane such that the P2 connector on the back of the 4-row DIN is pressed into the J2 connector of the left-most VMEbus slot that the EPC-8A subsystem will occupy.

The lower EXM EXM connector is denoted as EXM slot 0 and the upper as slot 1 as shown in the diagram. This information is needed later when configuring the installed EXMs.

Artisan Scientific - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisan-scientific.com

Artisan Technology Group is an independent supplier of quality pre-owned equipment
