Lab-Flex® Series

High Performance Coaxial Cable Assemblies

Smiths Interconnect's Lab-Flex product portfolio provides customers with a robust high performance solution for multiple applications and markets. The combination of repeatable, consistent performance and high reliability products translates to lower cost of ownership while improving system performance. The benefits enable customers to be more competitive with support of an established technology partner.

The Lab-Flex series is the benchmark of precision grade low loss PTFE cables designed for Test & Measurement, Defense, Commercial and other markets which need the ultimate in performance requirements.

This cable series has a very long heritage in high shock and vibration applications such as missile technology as well as repeatable performance in the test & measurement environment. The Lab-Flex cable has a low loss PTFE insulator for minimum attenuation and a solid silver plated copper center conductor for maximum measurement stability. The 125, 160, 190, 200 and 290 products represent the most common sizes needed for today's applications. Lab-Flex cables are an excellent choice for use in SatCom, Radar, Missile Guidance and Test & Measurement applications. Test reports are available on request.

Lab-Flex® Series,
benchmark precision
cable with long heritage
for multiple applications.

Features and Benefits

- Up to 50 GHz
- Low Loss (30% less than solid PTFE dielectrics)
- Superior EMI Shielding >90dB
- Phased Matched Pairs and Sets Available (standard tolerance is +/- one degree per GHz or +/-2.8 picoseconds)

Applications

- Ground SatCom
- Missile Guidance
- Radar
- Test & Measurement (Including TVAC)
- Communication Systems
- Point to Point Radio
