OT30
Rugged, Industrial Handheld Terminal

Rugged, Operator Interface

The new compact OT30 handheld terminal with an all new architecture is built to address those complex applications that are required to meet today's challenges. The new OT30, like all Termiflex terminals, is built to withstand rugged use. The OT30 is engineered to withstand repeated drops to hard surfaces, such as concrete and to resist liquid and other contaminants, without sacrificing ergonomic detail. For protection in extremely harsh environments, Termiflex offers a rubber boot, extended temperature components, conformal coating and additional moisture resistance.

Rugged Features Include:

New H8/300H Hitachi CPU with 32-bit architecture

20, 30, 40, or 45-key sealed membrane keypad with tactile and audible response, and optional backlight

42-key elastomeric keypad with tactile and audible response

Lexan® case (chemically resistant, mechanically durable)

Variety of serial communication interfaces, cables, input voltages, and display options available

Built-in power surge protection
