- Critical and expedited services
- In stock / Ready-to-ship

- We buy your excess, underutilized, and idle equipment
- Full-service, independent repair center

Artisan Scientific Corporation dba Artisan Technology Group is not an affiliate, representative, or authorized distributor for any manufacturer listed herein.

Product Overview

PhotoStress® Analysis

The LF/Z-2 Computerized Reflection
Polariscope System for Full-Field Stress Analysis

Micro-Measurements

What is PhotoStress® Analysis?

- A full-field stress and strain analysis method
- Can be utilized under various live load conditions
- Suitable for residual stress analysis, assembly stress inspection, and fatigue tests
- Can be applied to various materials (metals, composites, concrete, and more)
- Easy to use and analyze results

Suspensions

Aluminum (top),
composite material
(bottom)

Low load (top),
high load (bottom)

About PhotoStress

- The PhotoStress® analysis system is composed of a reflection polariscope and PSCalc® computer software that enables the user to store and process LF/Z-2 readings of stress and strain
- A variety of photoelastic coatings may be applied on a wide range of materials, with simple or complex shapes

LF/Z-2 Reflection
Polariscope—tripod-
mounted or handheld

PSCalc® Software

PhotoStress coating
applied to a structure of
complex shape

reflection polariscope

SPECIFICATIONS

Range	From 0% to 150% elongation (by various coating types)
Resolution	≈10 μs (for 3-mm coating thickness)
Measuring Area	Subject to coated area
Working Distance	Up to 3.05 m (10 ft)*
Light Source	White light
Operating System	Windows 2000, XP, Vista, Windows 7
Size and Weight	Maximum height: 1950 mm (76.4"); Assembled weight: 2.9 kg (6.3 lb)
Camera Resolution	Function of camera type used
Other Components	PSCalc computer software, laser-based direction indicator, USB compensator interface, application kit, portable operation handgrip, technical/operating manuals and tech notes

PhotoStress® Analysis System – Main Benefits and Solutions

- Instant identification of stress concentrations and zero-stressed areas
- Quantitative measurement of stress and strain at any point on the structure
- Validation of any finite element analysis (FEA)
- Weight reduction optimization
- Analysis of:
 - Stress resulting from fabrication tolerances
 - Stresses which occur during assembly processes
 - Residual stresses due to processes such as welding and casting
 - Simple or complex stress situations

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
