

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

ALLEN-BRADLEY

Allen-Bradley PLC-2/20 and PLC-2/30

CMOS RAM Memory Modules

Installation Data

To the Installer

CMOS RAM memory modules for the PLC-2/20 and the PLC-2/30 programmable controllers are available in two forms:

- cat. no. 1772-ME and 1772-MEB — to which memory segments (1772-MR, -MT, -MS, and MS8) can be added to create a module with a specific capacity
- cat. no. 1772-ME8, and 1772-ME16 — self-contained 8Kword and 16Kword memory modules

These memory modules have parity error detection which provides an on-line capability of automatically detecting single bit errors as well as detecting many multiple bit errors.

Memory modules provide storage for the user program, data table, I/O image table, and message area.

Each memory module requires one slot in the Processor Chassis (cat. no. 1772-LA)

Module Compatibility

CMOS RAM memory modules can be used in certain PLC-2 processors. Table A specifies the memory module(s) for each PLC-2 family processor.

CAUTION: Do not use a 1772-MEB or 1772-ME16 CMOS RAM memory module with a 1772-LG processor control module prior to revision F(6). When performing write block transfers, do not use a 1772-MEB or 1772-ME16 memory module with a 1772-LG processor control module prior to revision H(8). If this CAUTION is not observed, memory invalidation may occur.

Table A
PLC-2/20 and PLC-2/30 Memory Modules

Module Type	Compatible Processors		Memory Size	Maximum Data Table Size
	2/20	2/30		
1772-ME CMOS RAM	1772-LP1, -LP2, -LP2D4[1]	1772-LP3, -LP3D4[1]	8 Kwords (8192 words)	8064 words
1772-MEB CMOS RAM	1772-LP1, -LP2, -LP2D4 (8 Kword limit)	1772-LP3, -LP3D4	16 Kwords (16256 words)	8192words
1772-ME8 CMOS RAM	1772-LP1 -LP2, -LP2D4	1772-LP3, -LP3D4	8 Kwords (8192words)	8064 words
1772-ME16 CMOS RAM		1772-LP3, -LP3D4	16 Kwords (16256 words)	8192 words

[1] This processor contains a 24V dc system power supply.

CMOS RAM

The CMOS RAM memory modules (figure 1) and CMOS RAM segments form a solid-state electronic memory which features low power consumption. Data is stored electrically in the form of voltage levels. These levels are stored as either 1 or 0. The 1 and 0 represent binary digits, which are the smallest parts of a memory word.

Figure 1
CMOS RAM Memory Module (cat. no. 1772-ME or 1772-MEB) Equipped with a 2K Memory Segment (cat. no. 1772-MS)

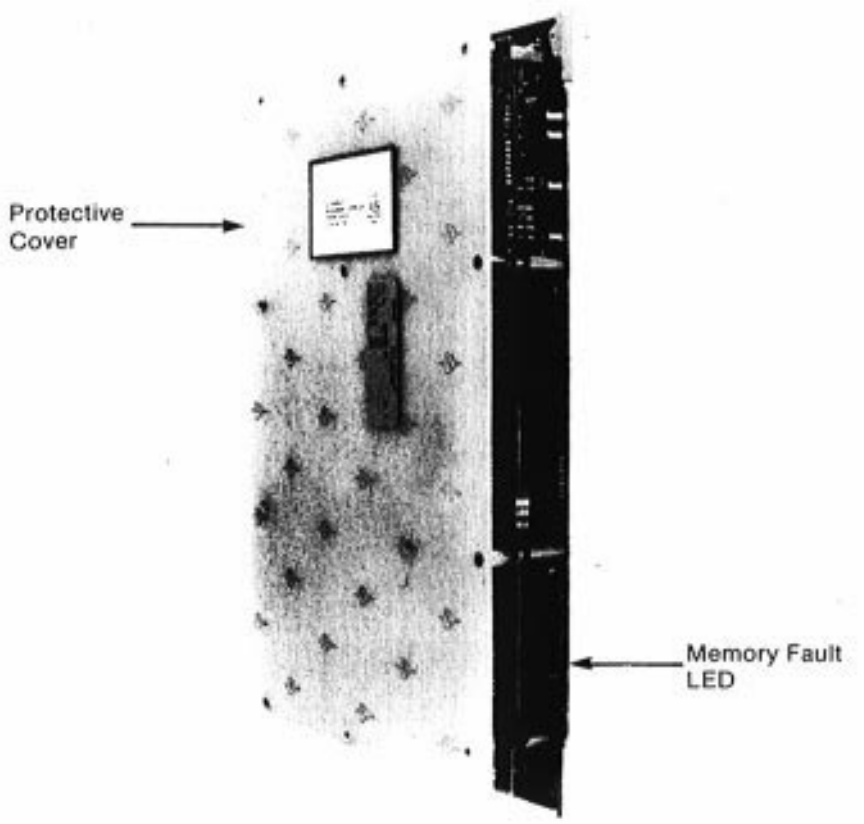

Figure 2
CMOS RAM Memory Module (cat. no. 1772-ME8 or 1772-ME16)

Rockwell Automation
Allen-Bradley

Allen-Bradley, a Rockwell Automation Business, has been helping its customers improve productivity and quality for more than 90 years. We design, manufacture and support a broad range of automation products worldwide. They include logic processors, power and motion control devices, operator interfaces, sensors and a variety of software. Rockwell is one of the worlds leading technology companies.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
