ARINC 429

VME Product Information

ARINC 429/575 Interface for VME

The A429-V module provides a 24 channel VMEbus interface with 16 transmit and 8 receive channels. Transmit channels are controlled through a label transmit sequence data structure where the host processor may control transmission sequences and timing. Receive channels may be configured to store data in a label buffer table structure or sequential logging buffer. The A429-V is fully supported with C libraries and device drivers with source code for easy integration.

General Specifications

- D16/D32/D32SBLT High Speed Transfers.
- ARINC 429 or 575 Operations.
- 32 bit, 1 usec time tag messages.
- 128K bytes Dual Port RAM.
