Product Details: IP-OCTAL-423
IP-OCTAL

Product Description

The IP-Octal-423 IndustryPack module implements eight EIA-423 asynchronous serial ports, each with RXD, TXD, RTS, and CTS signals.

Serial ports are implements with the Signetics SCC2698B octal UART. Each channel has a three-character FIFO on its receiver to allow longer interrupt servicing latencies. Eighteen programmable baud rates up to 38.4 kbps, and programmable bit length, parity, and stop bits are supported.

Four independent 16-bit timers are provided. The serial ports support automatic CTS control of the transmitter and change-of-state interrupts.

All signal levels are fully compliant with RS-423, including slew rate control and powered-off leakage current.

The RS-423 levels are also compatible and compliant with MIL-188-114.

Warranty

3 years
