Product Details: IP-OCTAL-232
IP-OCTAL SERIAL

sidebar photo

SBS Communications Group designs, manufactures and markets high performance OEM telecommunications platforms and sub-systems for CompactPCI, PMC and PCI ranging from stand-alone single board computers and WAN adapters to chassis and industrial enclosures.

Product Description

The IP-Octal-232 IndustryPack module implements eight EIA-232 asynchronous serial ports, each with RXD, TXD, RTS, and CTS signals. In addition, eight general-purpose input lines are provided with TTL switching levels.

Serial ports are implements with the Signetics SCC2698B octal UART. Each channel has a three-character FIFO on its receiver to allow longer interrupt servicing latencies. Eighteen programmable baud rates up to 38.4 kbps, and programmable bit length, parity, and stop bits are supported.

Four independent 16-bit timers are provided. The serial ports support automatic CTS control of the transmitter and change-of-state interrupts.

The IndustryPack Strobe* pin may be used as a clock input or output depending on the setting of user shunts.

Two serial channels may be configured for DMA use.

Warranty

3 years
