PCI-COM232-2 and PCI-COM232-4

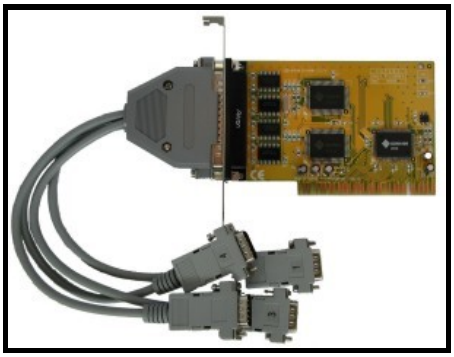

Dual and Quad Port RS-232, PCI-Bus Serial Communications Card

Features

- Universal PCI, PCI-X, 3.3V and 5V compatible (Call for PCI-Express availability)
- Two or Four RS-232 Serial Communication ports.
- Throughput up to 921.6 Kbps.
- 32-Bit PCI-bus Interface.
- UART includes 16-Byte FIFO Buffer.
- Compatible w/ MS-DOS, Windows, & Linux.
- FCC and CE approved

The PCI-COM232-2 and PCI-COM232-4 are high speed, dual or quad-port, asynchronous serial communications card for use in PCI-bus computers. They are 4.625 inches long (117.5 mm) and may be installed in any five-volt PCI slot in IBM compatible computers. A separate male DB9 connector is provided for each port, and for the quad-port, a breakout cable is included that terminates in DB9 connectors. Each independent port supports RS-232 single-ended transmission/reception at baud rates up to 921.6 Kbps. An on-board crystal oscillator provides means for precise baud rate selection. The card is UART-type-16C550 compatible and includes a 16-byte transmit/receive buffer to protect against lost data in multitasking systems. Extensive software driver support is provided on CD. The card automatically configures with Windows Plug & Play functionality.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
