World's #1 Choice For SCSI Cards

Mac OS

SCSI CONNECT 2906

Run Your Zip Drive Or Scanner Up To 6 Times Faster

PCI card for Macintosh

Product Benefits

- **Gain great performance: 10 MB/sec data transfer rate**
- **Preserve investment in existing SCSI peripherals**
- **Install with Plug-and-Play ease**
- **Achieve broadest compatibility**
- **Connect up to 7 SCSI peripherals with one card**

Speed Up Your System With SCSI

SCSI* moves information between your Macintosh and peripheral much faster than with standard interfaces. With SCSI, you'll save time with transfers up to 6 times than with a parallel port connection.

Install With Plug-and-Play Ease

Installation is a breeze. Just remove your computer's case, slide the card into a PCI expansion slot, and connect the SCSI peripherals. You'll be up and running in no time.

Achieve Broadest Compatibility

Adaptec SCSI Cards are tested with hundreds of computer systems and peripherals to ensure the widest possible support, now and in the future. And since peripheral manufacturers design to Adaptec products, you can count on broad compatibility.

Upgrade Your Mac Quickly

SCSI makes it easy to add a peripheral to your system. Daisy-chain up to 7 peripherals (internal, external, or both) to this SCSI Card and enjoy the same great performance. This SCSI Card is ideal for connecting SCSI Zip drives or scanners, and can be used to connect other Fast SCSI peripherals like tape or CD-ROM drives.

Trust Adaptec—The World's #1 Choice For SCSI Cards

Adaptec is the industry standard in SCSI Cards. And all Adaptec SCSI Cards are backed by a 5-year, limited warranty.

** SCSI stands for Small Computer System Interface and is pronounced "scuzzi".*

SCSI Connect 2906

Technical Specifications

Operating Systems :	Mac OS 8.0 or greater
PC Bus Type :	32-bit PCI
Total Devices Supported :	7 (internal or external)
Data Transfer Rate :	10 MByte/sec
Supported Protocols :	SCSI-1, SCSI-2 and Fast SCSI-2
Peripheral Support :	Non-bootable
External Connector :	DB25-pin (female)
Internal Connector :	50-pin standard (male)
Interface Transfer Method :	Bus Master DMA (Direct Memory Access)

System Requirements

- PCI-based Power Macintosh
- Mac OS 8.0 or greater
- PCI expansion slot
- SCSI peripheral

Package Includes

- AVA™-2906 SCSI Card
- Control Utility and other software on CD-Rom
- 50-pin internal SCSI cable (external cable not included)
- Installation Guide
- PowerDomain Control Utility User's Guide
- Registration Card
