

Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

SERVICE CENTER REPAIRS

Experienced engineers and technicians on staff at our full-service, in-house repair center

*InstraView*SM REMOTE INSPECTION

Remotely inspect equipment before purchasing with our interactive website at www.instraview.com ↗

WE BUY USED EQUIPMENT

Sell your excess, underutilized, and idle used equipment. We also offer credit for buy-backs and trade-ins. www.artisanng.com/WeBuyEquipment ↗

AdeptWindows Controller (AWC-II) Board Connectors and Indicators

An AWC-II system processor board is required for all Adept controllers and can be configured with a 68040 or 68060 CPU. This section describes the basic features of the AWC-II board.

1. Status LEDs.

Six two-color LEDs indicate diagnostic test, power control, and communication status.

SF/OK: red LED = System Fault, green LED = System OK

ES/HPE: red LED = E-Stop open, green LED = High Power Enabled

HD/LAN: red LED = Read/Write from CF, green LED = Ethernet access

During system bootup the red SF/OK and ES/HPE LEDs are lit and the red HD/LAN LED blinks. After system bootup, the SF/OK LED should show green. If the ES/HPE LED shows red, the E-Stop circuit is open. During compact flash reads and writes, the HD/LAN LED pulses red. When the AWC-II is active on an Ethernet network, the HD/LAN LED pulses green.

2. Two RS232 ports and one RS422/485 port. (Refer to the *Adept MV Controller User's Guide* for pin descriptions and locations.)

3. Ethernet connector: Shielded RJ-45 receptacle that supports 10 BaseT communications. (Refer to the *Adept MV Controller User's Guide*.)

4. Controller Interface Panel (CIP2): connector that accepts a standard 50-pin SCSI cable that routes signals and information to the CIP2. Note that the CIP2 does not communicate in SCSI format. (See [Section 3.3 on page 34](#) through [Section 3.6 on page 35](#) for basic installation details and refer to the *Adept MV Controller User's Guide* for complete details.)

5. Three IEEE 1394 ports: Top port connects to the Multi-Access Interface (MAI) module in the PA-4 chassis.
