new SuperSCSI

FEATURING...SuperInstall & SuperView

OVERVIEW

Intelligence and ease of use are hallmarks of the latest installation and SCSI management software from AdvanSys. Called SuperInstall and SuperView, AdvanSys has combined the experience gained from countless SCSI installations with the latest SCSI and Microsoft operating system diagnostic software to create a peerless view and support for SCSI environment.

From the novice user to the experienced SCSI advocate, SuperSCSI offers support and in-depth information about the host system and SCSI devices to quickly and easily resolve any system problems.

SuperSCSI
Intelligent Software application supports novice and expert users and enables speedy, error free, system setup, software and driver installation and configuration diagnostic.

The automated installation software analyzes the system OS for its driver requirements, then chooses and installs the drivers.

SuperSCSI comes bundled with an AdvanSys Ultra Host Adapter - 20 MB/sec transfer rate - two times faster than FAST SCSI. Whatever your need, there is a SuperSCSI/Ultra combination to meet it!

SuperView
Let's see how your SCSI devices are organized and functioning. At the click of a mouse, users can see which drivers are registered in the Device Manager IRQ assignments, solutions to Windows 95 error codes. SuperView users can access everything from general information on SCSI to highly specific data on a SCSI device.

SuperInstall
SuperInstall is an intelligent software designed to automatically check the host operating system for the correct drivers and install them where necessary.

SuperBoot
For new SCSI users who want to install CD Drives on new SCSI host adapters, this OS independent installation utility is perfect. After plugging in a new host adapter and CDD, users can switch on the PC and load AdvanSCSI Super SCSI software directly from the Super SCSI CD ROM. From the CD ROM, users create Microsoft, Novell, or leading Unix boot disks for simple, fast, and complete installations.

Compatibility Ensured
To assure the kind of compatibility that will keep you off the phone with unhappy customers, every AdvanSys product undergoes rigorous testing. Both hardware and software. In AdvanSys compatibility labs. And in the labs of AdvanSys OEM clients.

Something else separates AdvanSys. Its approach to technical support for customers. You will have access to tech support staff and field applications engineers. You can reach them by phone, via BBS, the World Wide Web, and through our Interactive Fax Service.
