

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

V93000

SoC Test System

The Single Scalable Test Platform

Watch video

In the age of IoT, 5G and artificial intelligence, more than half of all the microchips manufactured in the world are tested by our equipment. As the industry's leading manufacturer of automated test systems for semiconductor devices, we continuously revolutionize market standards and enable customers to shape their digital future.

Our V93000 platform addresses the latest industry challenges and enables applications like Artificial Intelligence (AI) & High-Performance Compute (HPC), medical devices, Advanced Driver Assistance Systems (ADAS), making the world safer, faster and our lives easier.

Thanks to the platform's scalability and compatibility over multiple generations, V93000 is future proof and saves cost. The all-in-one platform covers a variety of different solutions like RF, digital, power and analog.

Large Installed Base

Staying focused on the single scalable platform strategy, Advantest has developed a significant installed base of V93000 test systems in both engineering and high-volume manufacturing. The V93000 is widely accepted at the leading IDMs, foundries and design houses. Outsourced IDMs and fabless companies find the V93000's test capacity installed in all major OSATs worldwide.

Advantest Provides the Solution

As technology moves into the era of exascale computing, extreme test challenges arise in the areas of performance, cost-of-test, quality and time-to-volume. The EXA Scale provides cutting-edge innovations to address these challenges.

User Support

Call Center Support

Understand the customer's situation and provide the best solution

Customer Training

Various courses available for IC test engineers

Products Support

Provide technical support and maintenance
