Central Processing Unit

The C924-000 CPU Module processes 1000 words of user logic in .75 ms (200ns/instruction). The last two digits in C924 reflect the 24 bit architecture that the CPU uses. For time sensitive applications, a Time of Day clock which is rated at +/- 5 seconds per month is provided.

Figure 2-38 C924-000 Central Processing Unit (CPU) Module

Memory Module

The M909 Memory Module with its applicable Executive Cartridge provides the 984B controller with all of its system and application memory. It is available with either 32K, 64K, 96K, or 128K of 24 bit wide memory. This provides 32K or 64K of user logic with the balance of memory available for Extended Memory.
