- **For applications based on the Mapping 500K probe array, use only ovens that bear the label "Approved for 500K" on the front of the oven.**
- **This label confirms that Affymetrix has successfully performed a validated calibration procedure on the oven using traceable temperature measuring probes specific to the needs of the Mapping 500K array.**

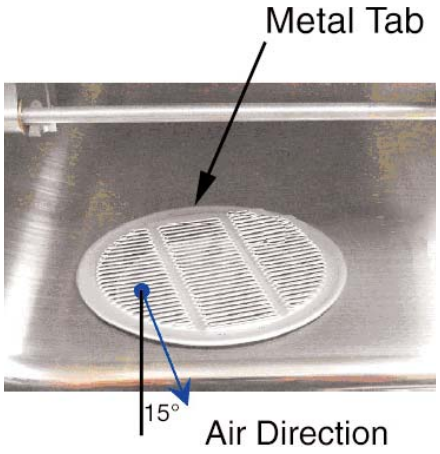

- **Do not attempt to monitor the thermal performance of the oven using non-Affymetrix temperature probes. Affymetrix calibrates the temperature profile at the factory to ensure proper operation.**

- **For light sensitive reagents, cover the front glass from the outside only.**

- **Do not adjust the position of the inlet vent louver located on the floor of the oven.**
- **The metal tab must be oriented approximately 15° as shown.**
- **The vent louvers must be directed towards the oven front door panel.**

AFFYMETRIX®

Quick Reference Card

Hybridization 640 Oven Best Practices

THIS QUICK REFERENCE CARD WAS DEVELOPED TO AID IN THE PROPER USE OF THE HYBRIDIZATION 640 OVEN.

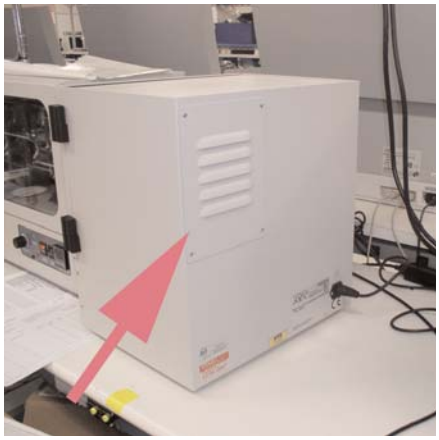

- **Never stack ovens.**

- **Place ovens away from air conditioning units**
- **Ensure proper amount of free space around oven.**

- **Allow for adequate air flow, i.e., do not block the vent.**

- **Balance the carousel as best possible using filled or unfilled probe array trays.**

- **Use a tray retainer (p/n 100-0026) to secure the probe arrays.**
