ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

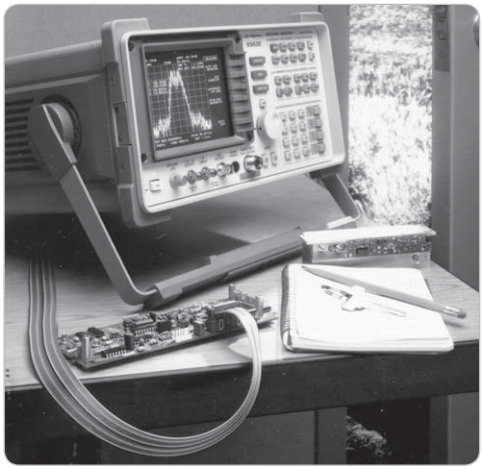

Expert team | Trust guarantee | 100% satisfaction

Agilent 85671A
Phase Noise Measurements Utility

Technical Overview

Enhance your 8560 series spectrum analyzer

For the Agilent 8560 series spectrum analyzers

Phase noise measurements made easy

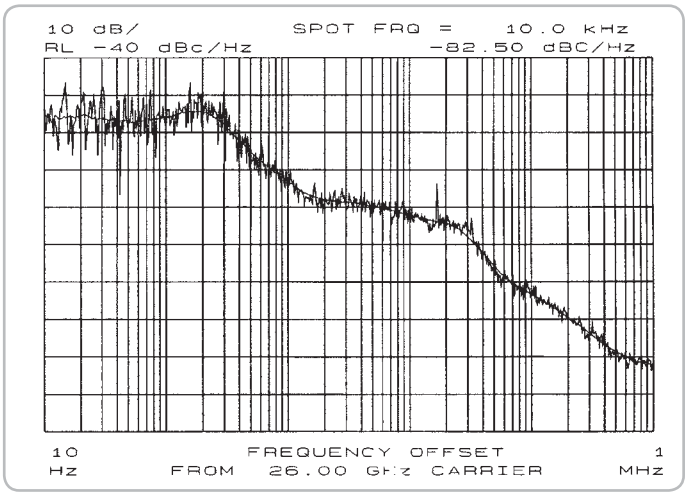

The Agilent Technologies 85671A phase noise measurement utility is a downloadable program that transforms your Agilent 8560 series spectrum analyzer into a phase noise tester. The 85671A removes much of the work of performing phase noise measurements.

The 85671A utility eliminates the time-consuming task of hand-drawing phase noise plots. For many oscillator phase noise measurements, you no longer need to spend time manually tuning your spectrum analyzer to multiple frequency offsets. You can quickly and easily generate graphs of phase noise (dBc/Hz) versus log offset frequency.

```
PHASE NOISE CONFIGURATION

        CARRIER FREQUENCY:  26.00 GHz
           SPOT FREQUENCY:  10.0 kHz
MINIMUM OFFSET FREQUENCY:   10 Hz
MAXIMUM OFFSET FREQUENCY:   1 MHz
LOG PLOT REFERENCE LEVEL:   -40 dBc/Hz

                FILTERING:  A LOT
              SMOOTHING:    NONE
          SIGNAL TRACKING:  OFF
```

85671A generated graph of phase noise

Easy, guided measurements

When you activate the 85671A, a configuration menu is displayed. All measurement parameters are in view on one screen, as shown below. Just use the softkeys to make any changes you need, and start the measurement.

Agilent Technologies

Additional productivity features

To help make you even more productive at your bench, the 85671A also offers:

- Direct phase noise readout
  Just position the spot frequency cursor at any offset frequency after you make a measurement, and the phase noise is numerically displayed.
- Variable filtering
  Now you can control trade-offs between measurement repeatability and measurement speed.
- Calculation of RMS noise
  RMS phase noise is integrated over a user-specified range under the phase noise curve and displayed in radians and degrees.
- Spot frequency measurements
  Quickly measure phase noise at a single frequency offset.
- Digitized hardcopy and storage
  Data can be printed and plotted, and traces can be stored in internal memory for future use.

Specifications

Specifications shown are based on the operation of an 8560 E-Series spectrum analyzer.

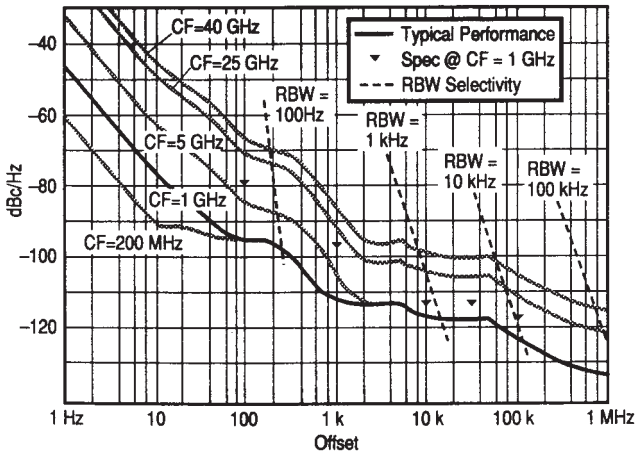

Measurement modes	Log Plot, Spot Frequency, RMS Noise
Carrier frequency range	
8560E/EC	30 Hz to 2.9 GHz
8561E/EC	30 Hz to 6.5 GHz
8562E/EC	30 Hz to 13.2 GHz
8563E/EC	30 Hz [2] to 26.5 GHz
8564E/EC	30 Hz [2] to 40 GHz
8565E/EC	30 Hz [2] to 50 GHz
Offset frequency range	10 Hz [1] to ≤ 100 MHz
Maximum number of decades	5 (whole decades only)
Maximum input signal level	+17 dBm (Ref Level = -50 dBc/Hz)
Minimum input signal level (for optimum dyn. range)	-17 dBm (offests ≤ 100 MHz, 10 dB input attenuation)
Measurement accuracy (nominal)	
Amplitude accuracy	±2.5 dB (≥ 10 dB above system noise floor)
Amplitude repeatability	±1.5 dB (Maximum filtering and 12 point smoothing)
Log graph frequency accuracy	±5%
Filtering	4 levels available
Smoothing	12 pt (2%), 24 pt (4%) 48 pt (8%), 96 pt (16%)

RMS Noise Calculation

RMS phase noise is calculated over a user specified integration range.

Number of data points used	All, ½, ¼, ⅛

System phase noise

Data Storage	5 internal trace memory registers
Log Graph Hardcopy	Outputs are compatible with PCL and HP-GL printers and plotters

1. *Minimum offset frequency is 10 times the minimum resolution bandwidth of the spectrum analyzer.*
2. *Requires option 006 for operation below 9 kHz.*

Agilent Technologies' Test and Measurement Support, Services, and Assistance

Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent's overall support policy: "Our Promise" and "Your Advantage."

Our Promise

"Our Promise" means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

Your Advantage

"Your Advantage" means that Agilent offers a wide range of additional expert test and measurement services, which you can purchase according to your unique technical and business needs. Solve problems efficiently and gain a competitive edge by contracting with us for calibration, extra- cost upgrades, out-of-warranty repairs, and on-site education and training, as well as design, system integration, project management, and other professional services. Experienced Agilent engineers and technicians worldwide can help you maximize your productivity, optimize the return on investment of your Agilent instruments and systems, and obtain dependable measurement accuracy for the life of those products.

Ordering Information

System requirements:

Phase Noise Measurement Utility	Mass Memory Module	Agilent Spectrum Analyzer
85671A	85620A (Rev. C) (Revision B of the 85620A can be upgraded to Revision C with the 85620-60015 upgrade kit, available for an additional charge.)	8560 A/E /EC (firmware 890720 and later) 8561A/B/E/EC (firmware 890720 and later) 8562A/B/E /EC (firmware 870728 and later) 8563A/E/EC 8564E/EC 8565E/EC

System recommendations: Precision frequency reference (standard on 8560 E-series and 8563A). The 8560 E/EC-series spectrum analyzers are strongly recommended for this application. They provide the best system phase noise performance, measurement accuracy, and measurement speed.

LXI is the LAN-based successor to GPIB, providing faster, more efficient connectivity. Agilent is a founding member of the LXI consortium.

Remove all doubt

Our repair and calibration services will get your equipment back to you, performing like new, when promised. You will get full value out of your Agilent equipment throughout its lifetime. Your equipment will be serviced by Agilent-trained technicians using the latest factory calibration procedures, automated repair diagnostics and genuine parts. You will always have the utmost confidence in your measurements. For information regarding self maintenance of this product, please contact your Agilent office.

Agilent offers a wide range of additional expert test and measurement services for your equipment, including initial start-up assistance, onsite education and training, as well as design, system integration, and project management.
