Agilent E1352A

32-Channel Single-Ended FET Multiplexer

Data Sheet

- **1-Slot, B-size, register based**
- **Up to 13,000 channels/s scanning with Agilent's DMMs**
- **100,000 switches/second from downloaded scan list**
- **Voltage, current, and resistance measurements**
- **Space for signal conditioning components**

Agilent E1352A

Description

The Agilent E1352A FET Multiplexer is a **B-size, 1-slot, register-based VXI module** that switches 32 channels of high only and one low common input.

The FET multiplexer module consists of a B-size component card (labeled E1351-66201 on each one) and a screw terminal block that plugs onto the component card. The E1352A is functionally similar to the E1351A and E1353A.

An analog bus connector on the faceplate provides easy connection to an E1326B DMM, E1411B DMM, and/or other slot-adjacent multiplexers. Common high, low, and guard signals are connected by tree switch to both the tree terminals on the terminal card and the analog bus connector.

Refer to the Agilent Technologies Website for instrument driver availability and downloading instructions, as well as for recent product updates, if applicable.

Configuration

Common high, low, and guard signals are connected by tree switch to both the tree terminals on the terminal card and the analog bus connector. A factory-installed removable wire jumper on the component card connects the low input to the guard input.

A digital bus cable is shipped with each module, which attaches to a digital bus connector on the faceplates and is used to synchronize scanned measurements up to 13,000/second with either the E1326B DMM or E1411B DMM. Use of this bus requires the SCPI command TRIGger:SOURce DBUS. To connect an external DMM to the FET multiplexer for high-speed scanning synchronization up to 100,000 switches/second, order the digital FET MUX-to-DMM cable below.

One analog bus cable is shipped with each module, making it easy to connect multiplexer common outputs together for slot-adjacent modules. If you are using a B-size mainframe, E1300B or E1301B, use the analog bus cable shipped with the E1326A DMM to connect it to the multiplexer(s).

C-size Adapter

For installing the E1352A in a C-size mainframe, the E1403C active adapter is recommended.

Product Specifications

Input

DC:
Maximum voltage (any terminal to any other terminal or chassis): 16 Vpk
AC rms:
Maximum voltage (any terminal to any other terminal or chassis): 16 Vpk
Maximum current (per channel common, non-inductive): 1 mA

DC

Maximum thermal offset per channel, differential Hi-Lo: 25 μV (0 to 28 °C), 250 μV (28 to 55 °C)
Closed channel resistance: <3.1 kΩ
Insulation resistance (between any two points): 10E8 Ω, 10E3 Ω ± 10% guard to chassis
Insulation resistance (Hi to Lo, power off): >1 kΩ for |Vin| <14 V, >220 Ω for |Vin| >14 V

AC

Minimum bandwidth (–3 dB, 50 Ω source/load): 500 kHz (1 MΩ || 10 pF termination)
Closed channel capacitance: <2000 pF Hi/Lo-Chassis, <200 pF Hi-Lo

General Characteristics

Relays: FETs
Break-before-make
Power down state: FETs open on power down
Power up state: FETs open on power up
Minimum relay life:
No load: Unlimited
Rated load: Unlimited
Reference junction measurement accuracy (18 to 28 °C operating): n/a
Strain gage excitation: n/a
Screw terminal wire size: 16 to 26 AWG (1.5, 1.2, 0.9, 0.75, 0.5 mm)
Scanning rate: 13,000 channels/s typ.

General Specifications

VXI Characteristics

VXI device type: Register based, A16, slave only
Size: B
Slots: 1
Connectors: P1
Shared memory: None
VXI busses: None
C-size compatibility: Requires E1403C

Instrument Drivers

See the Agilent Technologies Website (http://www.agilent.com/find/inst_drivers) for driver availability and downloading.

Command module firmware: Downloadable
Command module firmware rev: A.03
I-SCPI Win 3.1: Yes
I-SCPI Series 700: Yes
C-SCPI LynxOS: Yes
C-SCPI Series 700: Yes
Panel Drivers: Yes
VXI*plug&play* Win Framework: No
VXI*plug&play* Win 95/NT Framework: No
VXI*plug&play* HP-UX Framework: No

Module Current

	I_{PM}	I_{DM}
+5 V:	0.2	0.01
+12 V:	0.13	0.01
–12 V:	0	0
+24 V:	0	0
–24 V:	0	0
–5.2 V	0	0
–2 V:	0	0

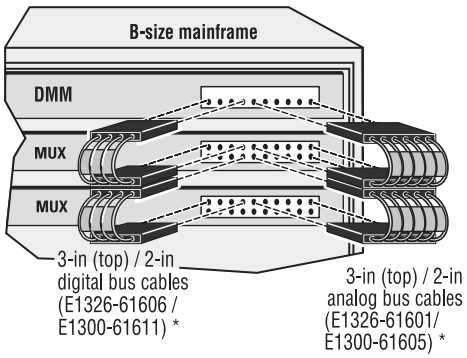

Cooling/Slot

Watts/slot: 1.00
ΔP mm H_2O: 0.02
Air Flow liter/s: 0.10

Agilent Technologies' test and measurement service/support commitment

Agilent strives to maximize the value our test and measurement products give you, while minimizing your risk and service/support problems. We work to ensure that each product is realistically described in the literature, meets its stated performance and functionality, has a clearly stated global warranty, and is supported at least five years beyond its production life. Our extensive self-help tools include many online resources (www.agilent.com).

Experienced Agilent test engineers throughout the world offer practical recommendations for product evaluation and selection. After you purchase an Agilent product, they can provide no-charge assistance with operation verification and basic measurement setups for advertised capabilities. To enhance the features, performance, and flexibility of your test and measurement products—and to help you solve application challenges—Agilent offers free or extra-cost product options and upgrades, and sell expert engineering, calibration, and other consulting services.
