TM660

RTM for the C660 6U CompactPCI Switch

Functional Description

System Support

The TM660 is designed for enclosures with a rear module depth of 80 mm, as specified in IEEE 1101.11. The TM660 may be adapted for use with enclosures whose rear module depth is greater than 80 mm by adding an extender (not included).

In order to accommodate all required I/O connectors, the TM660 front panel occupies two slots.

I/O Connectors

The transition module provides standard connectors for C660 I/O interfaces.

Ethernet Ports

In order to accommodate the available C660 port configurations (see the C660 datasheet for more information), the TM660 is offered in two different variants, as shown in the table below.

RS-232 Console Port

A 9-pin D-type connector for the RS-232 console port is provided in both TM660 variants.

Mechanical Features

The TM660 fully complies with IEEE 1101.11.
