ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

FAST-UXGA FRAME GRABBER

The Fast-UXGA is a two thirds raw-length PCI board with two (four muxed) UXGA input channels each with up to 205 MHz data acquisition rates. The front end data is formatted and preprocessed by a FPGA before being sent to the memory subsection, processor, GigE interfaces or other outputs. Finally, the Fast-UXGA interfaces to the host computer through a 4xPCIe or PCI-X interface for state-of-the-art data acquisition. Options include the addition of multiple(8) Serial ATA (SATA) 150 MB/sec interfaces for continuous high-speed data storage without the usual OS or PCI transfer delays and four GigE ports.

The Future of Image Aquisition and Processing

Fast-UXGA PCI-e and PCI-X Key Features:

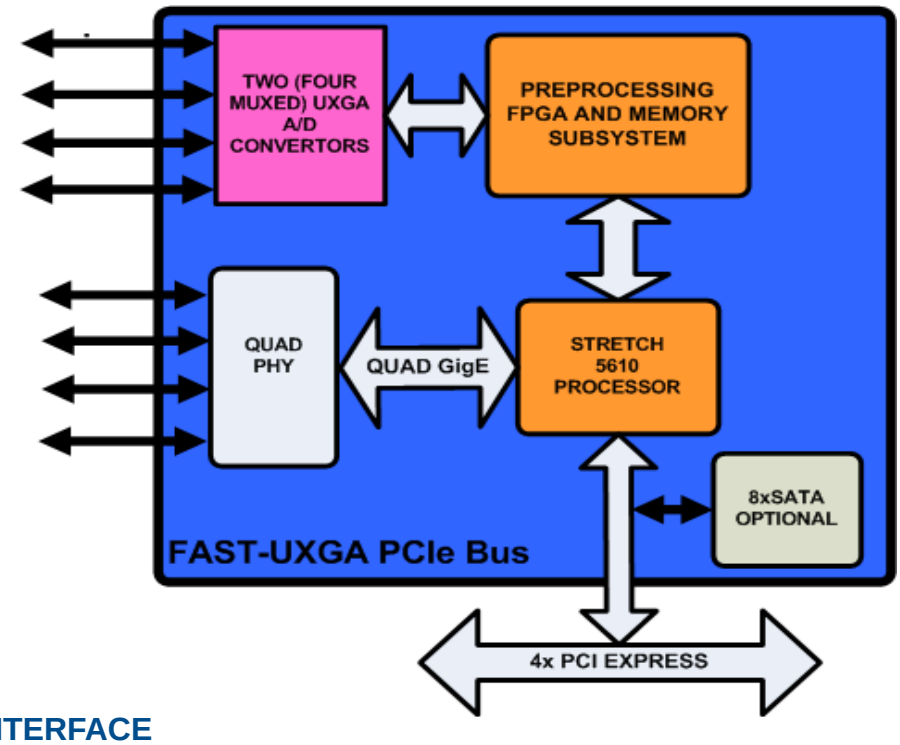

- **Raw PCI form factor board with 1-2GB dedicated high speed DDRAM for sustained real-time on-board storage**
- **STRETCH 5610 processor standard with 4 GigE interfaces for 100MBytes/sec per channel actual transfer I/O**
- **Collects data from two asynchronous (four muxed) UXGA 205 MHz channels**
- **Programmable FPGA for I/O interface configuration and processing**
- **PCI-X or PCI-e x4 bus interface**
- **Supported by standard firmware development tools, including fully optimized basic data manipulation, data formatting and image processing routines**
- **Drivers for Windows™ XP/Vista, Linux and Solaris™**

FAST-UXGA BOARDS

PCI-e INTERFACE

- Data width - x4 PCI-express
- Peak DMA rate - 1 GB/sec bidirectional.

PCI-X INTERFACE

- Data width - 32/64 bits
- Peak tranfer rate of 133 MHz

PROCESSOR OPTIONS

- One STRETCH processor with up to 2 GB of PC3200 DDRAM memory

SERIAL ATA I/O OPTION

- Up to eight SATA 150 MB/Sec disk I/O channels for high-speed real-time storage as JBOD or Raid

CAMERA CONTROL

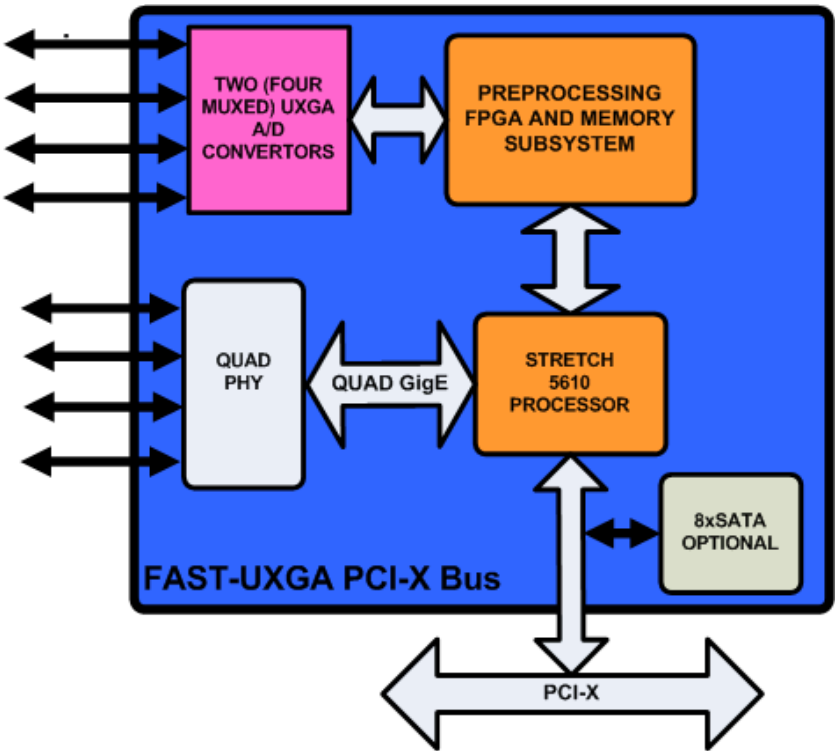

- Serial port- Asynch., RS-232 600-19,200 Baud

MEMORY OPTION

- One to two gigabytes of DDRAM memory directly connected to the input fpga for high-speed input

PCI-EXPRESS OPTION

- If sustained high-speed storage is desired up to eight SATA ports are available on the FAST-Xe for JBOD or raided storage of hundreds to thousands of gigabytes of storage per card.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
