Release Note **RN**

PC DH485 Interface Module

(Cat. No. 1784-KR)

To the Installer

If you are using the 1784-KR interface module with the 1747-PA2E Advanced Programming Software (APS), you need to install the Host PC software to interface the 1784-KR to the APS. Follow the instructions below to do this.

Installing the 1784-KR Module Host Software

The 1784-KR Host Software lets the APS communicate over the DH485 network using the 1784-KR module instead of the personal computer's serial communication port. To install the 1784-KR Host software:

1. Complete the hardware installation of the 1784-KR hardware in your PC system (See the PC DH485 Interface Module Installation Data, publication 1784-2.23, for details.)

2. Complete the software installation of the 1747-PA2E Advanced Programming Software (See the 1747-PA2E Advanced Programming Software user's manual, publication 1747-NM002, for details.)

3. Change to the directory where you installed the **aps.exe** file. The default location for the aps.exe file is \ipds\attach\slc500. To change to the default directory, type:

   ```
   cd\ipds\attach\slc500 [Return]
   ```

4. Copy the dh485cdl.exe file from the 1784-KR Host software diskette:

   a. Place the 1784-KR Host software disk in your system's floppy disk drive.

   b. Type the following (we assume you are using disk drive A):

   ```
   copy a:dh485cdl.exe kr.exe [Return]
   ```

This completes the installation of the 1784-KR Host software. When you start the APS package, you must configure the software before the 1784-KR module is used as the DH485 interface device.
