ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

REVERSING DRUM SWITCHES

Size A
Catalog Number 350-TAV32

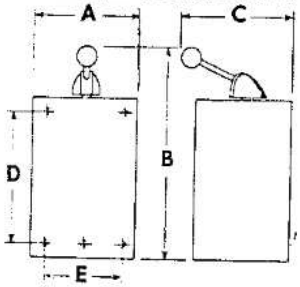

Size A
Oiltight Cavity Mounting
Catalog Number 350-TAV34

Size 1
Catalog Number 350-BAV

APPROXIMATE DIMENSIONS

Dimension = inches. Dim. ( ) = millimeter

Size	Dimensions				
	A Wide	B High	C Deep	D	E
A	2½ (64)	6 (153)	3 1/16 (78)	2 15/16 (75)	1¾ (45)
1	4 7/16 (113)	8 1/16 (205)	6⅛ (156)	4⅞ (124)	3⅝ (92)

The Bulletin 350 reversing drum switches are for starting and reversing squirrel-cage motors, single-phase motors that are designed for reversing service, and direct current shunt and compound-wound motors.

All Bulletin 350 switches are supplied as standard in the non-spring return (non-self centering) construction. The Size A and Size 1 drums can be easily changed in the field to spring return (self-centering).

Bulletin 350 drum switches are capable of switching motors directly. Care should be taken, however, in such applications since there is no "overload protection", "low-voltage release" or "no-voltage protection" unless a magnetic starter is also used. In order to insure protection, it is well to use a magnetic starter and a drum switch with one of the various interlocks listed below.

TYPE PP INTERLOCK — A push-pull interlock equivalent to 3-wire push-button control. Pushing down on the handle drops out the magnetic starter and permits the drum switch to be moved. Pulling up on the handle of the drum switch closes the magnetic starter.

TYPE K INTERLOCK — Consists of two contacts, one closing in the "Forward" position of the drum switch and one in the "Reverse". May be used to control the magnetic starter directly or through push buttons.

TYPE R INTERLOCK — Consists of a contact which closes in the "Off" position of the drum switch. Requires "Start, Stop" push buttons with magnetic starter.

CAVITY MOUNTING — The Size A drum switch is available with a flush plate for cavity mounting (oiltight) into a machine base. This construction is illustrated. If the oiltight cavity-mounting construction is wanted, change the last two figures in the listed catalog number to "34" and add **$16.00** list to the price.

OPEN TYPE FOR STEEL-PANEL MOUNTING — The size A drum switch can be supplied as an open-type device with an extra nameplate which will permit the drum switch to be mounted in a steel panel. Deduct **$4.00** list from the price and change catalog number to 350-TOV32.

OPERATING HANDLE — As standard these drum switches are supplied with a ball lever handle. Handle can be omitted at the following deduction from the listed price. Size A ..... **$2.00** Size 1 ..... **$6.00**

ORDERING INFORMATION — The following information is required when ordering: Catalog number. Horsepower and voltage rating of motor. Modifications.

Size	Maximum Horsepower Ratings					Type of Inter-Lock	Catalog Number Type 1 General Purpose		Price
	Single Phase		3 Phase		DC				
	110-120 Volts	220-240 Volts	208-240 Volts	415-600 Volts	115-250 Volts		AC	DC	
A	1½	2	2	2	¼	None	350-TAV32 ☆		$50
1	1½	3	5	7½	2 [1]	None	350-BAV ☆	350-BAZ	136
						R	BAV104	BAZ104	257
						K	☆ BAV111	BAZ111	257
						PP	BAV101	BAZ101	330

[1] Size 1 DC switches are equipped with permanent magnet blowouts.
