RMDs720 Recorder Mission Download Station

Ground Systems

The Ampex RMDs720 is an integrated Windows-based PC system tailored for extracting and (optionally) demultiplexing data from mini Removable Memory Modules used by the Ampex miniR700 and DSRs500 recorders. With an internal RAID array, and removable media options including tape drives, disk packs, and an optical disk writer, the system is equipped to be both a standalone system and a laboratory ingest unit.

- Download Station for miniR mRMM cartridges (14GB to 448GB)
- Rack Mountable (2U)
- Optional "On-the-Fly" Demultiplexing to Local or Network Storage
- Expanded Local Storage Option
- Removable HDD Option
- Windows XP-based
- Internal LTO-4 Tape Drive Option
- Internal Blu-Ray Optical Disk Writer Option

Login for specifications on the RMDs720 Recorder Mission Download Station from Ampex
