

## Artisan Technology Group is your source for quality new and certified-used/pre-owned equipment

- FAST SHIPPING AND DELIVERY
- TENS OF THOUSANDS OF IN-STOCK ITEMS
- EQUIPMENT DEMOS
- HUNDREDS OF MANUFACTURERS SUPPORTED
- LEASING/MONTHLY RENTALS
- ITAR CERTIFIED SECURE ASSET SOLUTIONS

### SERVICE CENTER REPAIRS

Experienced engineers and technicians on staff at our full-service, in-house repair center

### *InstraView*<sup>SM</sup> REMOTE INSPECTION

Remotely inspect equipment before purchasing with our interactive website at [www.instraview.com](http://www.instraview.com) ↗

### WE BUY USED EQUIPMENT

Sell your excess, underutilized, and idle used equipment. We also offer credit for buy-backs and trade-ins. [www.artisanng.com/WeBuyEquipment](http://www.artisanng.com/WeBuyEquipment) ↗

# Light Source AQ-4303B

*Ideal light source for loss-wavelength characteristics measurement*

## General

The AQ-4303B is a white light source effective for loss-wavelength characteristics measurement of optical fibers and devices.

This wide-band, highly stable light source, which employs a high-power halogen lamp, provides CW light and 270 Hz square wave modulated light by the chopper incorporated.

The AQ-4303B also incorporates an optical filter that can be readily inserted by switch operation to remove higher-order optical components.

## Features

- **Wide-band, highly stable output**

The AQ-4303B covers a band of 400 to 1800 nm and provides highly stable optical outputs with a deviation of  $\pm 0.05$  dB.

- **270Hz chopped light**

The AQ-4303B provides 270 Hz square wave modulated light by a chopper for low-level measurement.

- **Removal of higher-order optical components**

The built-in optical filter can be inserted by simple switch operation to prevent higher-order optical components from entering the band selected.

- **GP-IB remote control**

The AQ-4303B is provided as standard with a GP-IB remote-control function that enables automatic measuring system setup.

## Applications

The AQ-4303B, in conjunction with the AQ-6315A/B Optical Spectrum Analyzer, is effective in measuring loss-wavelength characteristics of optical fibers and devices.

# Light Source AQ-4303B

## Specifications

Wavelength range	400 to 1800 nm
Output stability	±0.05 dB (at 20 °C, for 1 hour)
Output waveform	CW or 270 Hz chopped light
Output level	-45 dBm or more (50/125 μm GI fiber, wavelength of 850 nm and 1300 nm, bandwidth of 10 nm, CW)
GP-IB interface	Supplied as standard
Power requirements	AC 100 to 200V, 200 to 240V, 50/60 Hz, approx. 160 VA
Dimensions and mass	Approx. 212(W) x 133(H) x 250(D) mm, approx. 5 kg
Accessories	Power cord; 1, instruction manual; 1 copy

Note: The standard optical connector is FC type. Inquire for information on other optical connectors.

## Measuring System

Typical measuring system for optical fiber loss-wavelength characteristics measurement
